Advanced Intelligent Computing Theories and Applications. With Aspects of Theoretical and Methodological Issues De-Shuang Huang, Donald C. Wunsch, Daniel S. Levine, Kang-Hyun Jo, 2008-08-28 The International Conference on Intelligent Computing ICIC was formed to provide an annual forum dedicated to the emerging and challenging topics in artificial intelligence machine learning bioinformatics and computational biology etc It aims to bring together researchers and practitioners from both academia and industry to share ideas problems and solutions related to the multifaceted aspects of intelligent computing ICIC 2008 held in Shanghai China September 15 18 2008 constituted the 4th International Conference on Intelligent Computing It built upon the success of ICIC 2007 ICIC 2006 and ICIC 2005 held in Qingdao Kunming and Hefei China 2007 2006 and 2005 respectively This year the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications Therefore the theme for this conference was Emerging Intelligent Computing Technology and Applications Papers focusing on this theme were solicited addressing theories methodologies and applications in science and technology

Advanced Computing, Networking and Informatics- Volume 1 Malay Kumar Kundu, Durga Prasad Mohapatra, Amit Konar, Aruna Chakraborty, 2014-05-26 Advanced Computing Networking and Informatics are three distinct and mutually exclusive disciplines of knowledge with no apparent sharing overlap among them However their convergence is observed in many real world applications including cyber security internet banking healthcare sensor networks cognitive radio pervasive computing amidst many others This two volume proceedings explore the combined use of Advanced Computing and Informatics in the next generation wireless networks and security signal and image processing ontology and human computer interfaces HCI The two volumes together include 148 scholarly papers which have been accepted for presentation from over 640 submissions in the second International Conference on Advanced Computing Networking and Informatics 2014 held in Kolkata India during June 24 26 2014 The first volume includes innovative computing techniques and relevant research results in informatics with selective applications in pattern recognition signal image processing and HCI The second volume on the other hand demonstrates the possible scope of the computing techniques and informatics in wireless communications networking and security

Genetic Programming Krzysztof Krawiec, Alberto Moraglio, Ting Hu, A. Sima Etaner-Uyar, Bin Hu, 2013-03-14 This book constitutes the refereed proceedings of the 16th European Conference on Genetic Programming EuroGP 2013 held in Vienna Austria in April 2013 co-located with the Evo 2013 events EvoMUSART EvoCOP EvoBIO and EvoApplications The 18 revised full papers presented together with 5 poster papers were carefully reviewed and selected from 47 submissions The wide range of topics in this volume reflects the current state of research in the field including different genres of GP tree based linear grammar based Cartesian theory

Cloud Computing and Big Data Weizhong Qiang,Xianghan Zheng,Ching-Hsien Hsu,2016-01-09 This book constitutes the refereed proceedings of the Second International Conference on Cloud Computing and Big Data CloudCom Asia 2015 held in Huangshan China in June 2015 The 29 full papers and two keynote speeches were carefully reviewed and selected from 106 submissions The papers are organized in topical sections on cloud architecture applications big data and social network security and privacy

Proceedings of the International Conference on Artificial Intelligence and Computer Vision (AICV2020) Aboul-Ella Hassanien,Ahmad Taher Azar,Tarek Gaber,Diego Oliva,Fahmy M. Tolba,2020-03-23 This book presents the proceedings of the 1st International Conference on Artificial Intelligence and Computer Visions AICV 2020 which took place in Cairo Egypt from April 8 to 10 2020 This international conference which highlighted essential research and developments in the fields of artificial intelligence and computer visions was organized by the Scientific Research Group in Egypt SRGE The book is divided into sections covering the following topics swarm based optimization mining and data analysis deep learning and applications machine learning and applications image processing and computer vision intelligent systems and applications and intelligent networks

Frontier Computing Jason C Hung,Neil Y. Yen,Kuan-Ching Li,2016-07-28 This volume contains the proceedings of the 4th International Conference on Frontier Computing FC 2015 Bangkok Thailand September 9 11 2015 and brings together state of the art results covering many aspects of emerging computer science and information technology from international academic and industrial researchers FC 2015 aimed at providing an open forum to reach a comprehensive understanding of the recent advances and developing trends in information technology computer science and engineering with themes under the scope of communication networks business intelligence and knowledge management web intelligence and any related fields that prompt the development of information technology Contributions cover a wide spectrum of topics database and data mining networking and communications web and internet of things embedded system soft computing social network analysis security and privacy optics communication and ubiquitous pervasive computing Many papers have shown great academic potential and value and in addition indicate promising directions of research in the focused realm of this conference series Readers including students researchers and industry professionals will benefit from the results presented in this book and it provides indicators for emerging trends for those starting their research careers

Analysis, Retrieval and Delivery of Multimedia Content Nicola Adami,Andrea Cavallaro,Riccardo Leonardi,Pierangelo Migliorati,2012-08-09 Covering some of the most cutting edge research on the delivery and retrieval of interactive multimedia content this volume of specially chosen contributions provides the most updated perspective on one of the hottest contemporary topics The material represents extended versions of papers presented at the 11th International Workshop on Image Analysis for Multimedia Interactive Services a vital international forum on this fast moving field Logically organized in discrete sections that approach the subject from its various angles the content deals in turn with content analysis motion and activity analysis

high level descriptors and video retrieval 3 D and multi view and multimedia delivery The chapters cover the finest detail of emerging techniques such as the use of high level audio information in improving scene segmentation and the use of subjective logic for forensic visual surveillance On content delivery the book examines both images and video focusing on key subjects including an efficient pre fetching strategy for JPEG 2000 image sequences Further contributions look at new methodologies for simultaneous block reconstruction and provide a trellis based algorithm for faster motion vector decision making

Intelligent Computing and Information and Communication Subhash Bhalla, Vikrant Bhateja, Anjali A. Chandavale, Anil S. Hiwale, Suresh Chandra Satapathy, 2018-01-19 The volume presents high quality research papers presented at Second International Conference on Information and Communication Technology for Intelligent Systems ICICC 2017 The conference was held during 2 4 August 2017 Pune India and organized communally by Dr Vishwanath Karad MIT World Peace University Pune India at MIT College of Engineering Pune and supported by All India Council for Technical Education AICTE and Council of Scientific and Industrial Research CSIR The volume contains research papers focused on ICT for intelligent computation communications and audio and video data processing

Frontiers in AI and Computational Technologies Ahmed J. Obaid, Zdzisław Polkowski, Adriana Burlea-Schiopoiu, Muthmainnah Muthmainnah, 2025-05-19 This book presents recent research on the application of Artificial Intelligence and Computational Technologies as discussed at the 2nd International Conference on Emerging Trends in AI and Computational Technologies The contributions in this volume highlight the advancements in AI fields and computational technologies such as machine learning generative intelligence and language based models and illustrate their transformative impact on their applications This proceeding comprising many techniques that focus on using AI in many fields such as Climate Change and Biodiversity Conservation Sustainability and Environmental Impact Education and Learning Techniques Smart City Planning and Management and Agriculture for Sustainable Food Production also introduces innovative methodologies and presents the findings derived from their original research Theoretical and empirical studies featured in this book employ a range of computational techniques including deep learning frameworks data driven analysis and optimization algorithms These approaches enhance the performance and efficiency of various applications in sectors like healthcare finance and entertainment Additionally the book explores the ethical implications of deploying AI technologies and provides strategies to navigate the associated risks The chapters discuss essential topics such as methodology validation and the implications of AI in real world scenarios making this book a vital resource for understanding and leveraging the power of Artificial Intelligence and Computational Technologies in contemporary applications

subject Computer Science Programming grade A University College Dublin course Natural Computing language English abstract Genetic Programming is a biological evolution inspired technique for computer programs to solve problems automatically by evolving iteratively using a fitness function The advantage of this type programming is that it only defines the basics As a result of this it is a flexible solution for broad range of domains Classification has been one of the most compelling problems in machine learning In this paper there is a comparison between genetic programming classifier and conventional classification algorithms like Naive Bayes C4 5 decision tree Random Forest Support Vector Machines and k Nearest Neighbour The experiment is done on several data sets with different sizes feature sets and attribute properties There is also an experiment on the time complexity of each classifier method
