The Book of Why Judea Pearl, Dana Mackenzie, 2018-05-15 A Turing Award winning computer scientist and statistician shows how understanding causality has revolutionized science and will revolutionize artificial intelligence Correlation is not causation This mantra chanted by scientists for more than a century has led to a virtual prohibition on causal talk Today that taboo is dead The causal revolution instigated by Judea Pearl and his colleagues has cut through a century of confusion and established causality the study of cause and effect on a firm scientific basis His work explains how we can know easy things like whether it was rain or a sprinkler that made a sidewalk wet and how to answer hard questions like whether a drug cured an illness Pearl s work enables us to know not just whether one thing causes another it lets us explore the world that is and the worlds that could have been It shows us the essence of human thought and key to artificial intelligence Anyone who wants to understand either needs **The Book of Why**

Strengthening South Korea-Japan Relations Dennis Patterson, Jangsup Choi, 2024-04-09 At the conclusion of WWII no part of the world experienced a more dramatic transformation than East Asia The region's political stability throughout the postwar period prompted exponential economic growth that ultimately established South Korea Japan and China as East Asia's most important powers While many citizens of these nations now live in a time of unprecedented prosperity the arrangement that supported this region's transformation is fragile With the second largest economy and a burgeoning military sector China is widely acknowledged as the preeminent rising world power The onus of maintaining balance in the region now rests primarily with South Korea and Japan in partnership with the United States However because of long standing weaknesses in South Korea Japan relations and an inconsistent US commitment to the region the possibility that China could usher in a more uncertain era of revisionism has never been more likely In *Strengthening South Korea Japan Relations East Asia's International Order and a Rising China* Dennis Patterson and Jangsup Choi address the historical roots of this weak alliance Combining decades of research with current public opinion data the authors warn that the tendency of these nations to rely on the United States to maintain the status quo has become dangerously unstable A new strategy one of cooperation and collaboration is needed to prevent China from upending the region's current liberal international order
