*The Smartification of Everything* Masha Gugganig,Kelly Bronson,Vincent Mirza,2025-10-14 From the smart phone to the smart home smartness has become an almost inescapable reality of everyday

life. Supposedly intelligent interconnected technologies smart systems have taken on their own forms of life and it is no longer easy to determine who these systems benefit and what their long term social and ethical implications may be. In twenty contributions spanning the social sciences humanities and the arts *The Smartification of Everything* offers a deep dive into a variety of studies that critically interrogate smartification processes and systems. The book is edited by experts in science and technology studies STS anthropology and sociology and is written by academics and artists working across a diverse range of disciplines including geography architecture and urban studies among others. The volume moves beyond the digital hype cycle around smart cities artificial intelligence or the Internet of Things which presents smart tech as neat spaces of continuous improvement.
