Tabu Search Fred W. Glover, Manuel Laguna, 2013-12-01 Faced with the challenge of solving hard optimization problems that abound in the real world classical methods often encounter great difficulty even when equipped with a theoretical guarantee of finding an optimal solution Vital applications in business engineering economics and science cannot be tackled with any reasonable hope of success within practical time horizons by solution methods that have been the predominant focus of academic research throughout the past three decades and which are still the focus of many textbooks The impact of technology and the advent of the computer age have presented us with the need and opportunity to solve a range of problems that could scarcely have been envisioned in the past We are confronted with applications that span the realms of resource planning telecommunications VLSI design financial analysis scheduling space planning energy distribution molecular engineering logistics pattern classification flexible manufacturing waste management mineral exploration biomedical analysis environmental conservation and scores of others

Essays and Surveys in Metaheuristics Celso C. Ribeiro, Pierre Hansen, 2012-12-06 Finding exact solutions to many combinatorial optimization problems in business engineering and science still poses a real challenge despite the impact of recent advances in mathematical programming and computer technology New fields of applications such as computational biology electronic commerce and supply chain management bring new challenges and needs for algorithms and optimization techniques Metaheuristics are master procedures that guide and modify the operations of subordinate heuristics to produce improved approximate solutions to hard optimization problems with respect to more

simple algorithms They also provide fast and robust tools producing high quality solutions in reasonable computation times The field of metaheuristics has been fast evolving in recent years Tech niques such as simulated annealing tabu search genetic algorithms scatter search greedy randomized adaptive search variable neighborhood search ant systems and their hybrids are currently among the most efficient and robust optimization strategies to find high quality solutions to many real life optimiza tion problems A very large nmnber of successful applications of metaheuristics are reported in the literature and spread throughout many books journals and conference proceedings A series of international conferences entirely devoted to the theory applications and computational developments in metaheuristics has been attracting an increasing number of participants from universities and the industry

**Design of Heuristic Algorithms for Hard Optimization** Éric D. Taillard,2022-10-29 This open access book demonstrates all the steps required to design heuristic algorithms for difficult optimization The classic problem of the travelling salesman is used as a common thread to illustrate all the techniques discussed This problem is ideal for introducing readers to the subject because it is very intuitive and its solutions can be graphically represented The book features a wealth of illustrations that allow the concepts to be understood at a glance The book approaches the main metaheuristics from a new angle deconstructing them into a few key concepts presented in separate chapters construction improvement decomposition randomization and learning methods Each metaheuristic can then be presented in simplified form as a combination of these concepts This approach avoids giving the impression that metaheuristics is a non formal discipline a kind of cloud sculpture Moreover it provides concrete applications of the travelling salesman problem which illustrate in just a few lines of code how to design a new heuristic and remove all ambiguities left by a general framework Two chapters reviewing the basics of combinatorial optimization and complexity theory make the book self contained As such even readers with a very limited background in the field will be able to follow all the content
