Makers at Work Steven Osborn, 2013-09-27

What do you get when you combine an electronics hobbyist, hacker, garage mechanic, kitchen table inventor, tinkerer, and entrepreneur? A maker, of course. Playful and creative makers are through expertise and experimentation creating art, products, and processes that change the way we think and interact with the world. As you'll see from the 21 interviews in *Makers at Work*, inquisitive makers are just as apt to pick up a laser cutter or an Arduino as a wrench to fashion something new. For example, you'll meet Jeri Ellsworth who might provide a video lecture on magnetic logic one day and a tutorial on welding a roll bar on a stock car the next. You'll also meet Eben Upton who put cheap, powerful computing in the hands of everyone with the Raspberry Pi, Becky Stern who jazzes up clothing with sensors and LEDs, and bunny Huang who knows the ins and outs of the Shenzhen, China electronics parts markets as well as anyone. As all the interviews in *Makers at Work* show, makers have something in common: reverence for our technical past coupled with an aversion to convention. If they can't invent new processes or products, it's simply not worth doing. Crazy as foxes, makers working in the spirit of Tesla, Wozniak, Edison, Gates, Musk, and many others can bring sophisticated products to the people or to the market as fast or faster than large corporations. And they are not just enabling new technologies and devices; they are changing the way these devices are funded, manufactured, assembled, and delivered. *Makers at Work* puts a spotlight on the maker mindset and motivation of those who are reinventing the world, one object or idea at a time. You will meet the individuals who define what it means to be a maker. Learn about the tools and technologies driving the new industrial revolution. Discover ways to scale your weekend project into a profitable business. See how others have used crowdfunding to make their visions a reality. Learn how open source hardware and software is enabling whole new categories of products by removing barriers of entry for inventors. The new masters of the Makerverse ask two questions: Can it be done? Is it fun? As these interviews will show, the answer to both questions is: Let's find out.
