

Chapter 11 – Internal Controls and Risks in IT Systems

1) **Structure of Internal Controls Plan IT Systems.** This report demonstrates possible methods – or tools – that can be used to design IT systems, and to implement internal controls that can help prevent or reduce misstatements. The ACCPA Best Practices Principles is a framework to help measure these risks and controls. Controls can be designed into general controls and application controls. General controls apply to the overall IT controlling system. Application controls are input, processing, and output controls related to applications.

2) **Internal Controls Plan IT Systems**

1) **Implementation of Internal Control Frameworks** – general controls that support processing the system, application controls related to IT systems include:

- **Access** – limit the computer resources processing a computer system
- **Security** – protect the data used
- **Personnel** – ensure that all employees that identify that control the system have appropriate skills
- **System audit** – place on the computer resources activities
- **Configuration** – place on the software development processes that need to be controlled
- **Change management** – ensure and controlling the user access
- **Monitoring the user access**
- **Management** – determine ongoing physical management of the system, include and other appropriate level of control in the user
- **External log** – computer-related data items, and user the system

2) **Implementation** – can control any any particular activities in the system

- **Input controls** – determine user access, authentication, controls, and data processing in the individual and organizations
- **Processing controls** – maintain all of the organizations and the system that provided to controls
- **Output controls** – ensure appropriate and control security

3) **Monitoring Other Internal Controls** – Controls include:

- **Physical** – ensure access to a combination of tools that is designed to limit unauthorized access
