Excerpt from An Introduction to General Psychology The preface of a book is usually an apology for its existence This one is no exception to the rule The large number of already available text books in Psychology makes pertinent the question Why another In attempting to justify the appearance of this one I would first call attention to the need of a growing science such as Psychology for constant revision and the envisagement of its problems from various angles This has doubtless been the occasion for many of the texts which we already have The chief motives for the writing of the present book were two The first of these was to supply a general elementary text book which would meet the demands of the average student beginner a little more adequately than has been done hitherto After ten years experience in teaching a first course in Psychology I have become convinced that the mode of attack usually followed fails to supply the student with the sort of introduction into the science of mind that will enable him on the one hand to connect his Psychology with everyday life and on the other hand to apprehend the bearings of this science upon Philosophy Education Sociology and Biology About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
