*Diagrammatic Representation and Inference* Alan Blackwell, Kim Marriott, Atsushi Shimojima, 2004-07-16 Although diagrammatic representations have been a feature of human communication from early history recent advances in printing and electronic media technology have introduced increasingly sophisticated visual representations into everyday life We need to

improve our understanding of the role of diagrams and sketches in communication cognition creative thought and problem solving These concerns have triggered a surge of interest in the study of diagrammatic notations especially in academic disciplines dealing with cognition computation and communication We believe that the study of diagrammatic communication is best pursued as an interdisciplinary endeavor The Diagrams conference series was launched to support an international research community with this common goal After successful meetings in Edinburgh 2000 and Georgia 2002 Diagrams 2004 was the third event in the series The Diagrams series attracts a large number of researchers from virtually all academic fields who are studying the nature of diagrammatic representations their use in human communication and cognitive or computational mechanisms for processing diagrams By combining several earlier workshop and symposium series that were held in the US and Europe Reasoning with Diagrammatic Representations DR US Thinking with Diagrams TWD Europe and Theory of Visual Languages TVL Europe Diagrams has emerged as a major international conference on this topic [Journal of Information & Optimization Sciences](#) ,2006
