Inspection-oriented Tolerancing - Size, Form and Location Robert Roithmeier,2016-10-13 *Measuring Strategies in Tactile Coordinate Metrology* Robert Roithmeier,2014-10-24 Today there is hardly any workpiece whose form parameters cannot be measured by means of coordinate measuring machines The universal use of these machines allows a wide range of application of this technology which however increases inevitably the complexity of its handling The numerous options of the machine specific operating software on the one hand and the various theoretical considerations regarding a target oriented treatment of measuring jobs on the other hand result in the fact that the measuring results obtained from the same coordinate measuring machine on the same workpiece under similar conditions may differ In Order to increase the comparability of measuring results it is necessary to provide the operators of coordinate measuring machines in addition to a well founded AUKOM training with procedure options for planning performing evaluating and documenting measurements This book by the ZEISS Metrology Academy makes a contribution towards achieving these targets
