The Learning Rainforest: Great Teaching in Real Classrooms Tom Sherrington,2017-10-23 The Learning Rainforest is an attempt to capture various different elements of our understanding and experience of teaching It is a celebration of great teaching the joy of it and the intellectual and personal rewards that teaching brings It is aimed at teachers of all kinds busy people working in complex environments with little time to spare The core of the book is a guide to making teaching both effective and manageable it provides an accessible summary of key contemporary evidence based ideas about teaching and learning and the debates that all teachers should be engaging in It s a book packed with strategies for making great teaching attainable in the context of real schools The Learning Rainforest metaphor is an attempt to capture various different elements of our understanding and

experience of teaching Tom's ideas about what constitutes great teaching are drawn from his experiences as a teacher and a school leader over the last 30 years alongside everything he has read and all the debates he's engaged with during that time. An underlying theme of this book is that a career in teaching is a process of continual personal development and professional learning as is engaging in fundamental debates. We argue about the kind of education we value. As you meet each new class and move from school to school your perspectives shift your sense of what seems to work adjusts to each new context. In writing this book Tom is trying to capture some of the journey he's been on. He has learned that it is ok to change your mind. More than that sometimes it is simply necessary to get your head out of the sand to change direction to admit your mistakes.

**Designing and Implementing Multimodal Curricula and Programs** J. C. Lee, Santosh Khadka, 2018-01-19 This volume presents a comprehensive overview of multimodal approaches to curriculum and programmatic implementation across a diverse range of teaching environments and across geographic and cultural boundaries. Featuring contributions from scholars within and across both disciplines the book examines the ways in which new technologies link to expanding definitions of literacy and building on this how multimodal approaches might most effectively address the unique opportunities and challenges instructors face in contemporary classrooms and professional development programs. Chapters draw on case studies from both existing scholarship and findings from the authors' own experiences in practice including examples from writing rhetoric and composition courses, open online learning courses and interdisciplinary faculty training programs. The final section of the book showcases how the conversation might be further extended to address increasingly multilingual classrooms by exploring how multimodality has been implemented in transnational settings. Engaging with key questions at the intersection of programmatic and curricular development and multimodal studies this book is a fundamental resource for graduate students and scholars in multimodality, rhetoric studies, language education, applied linguistics and communication studies.
