

Measure Theory

Cardinality

Given a map $f: X \rightarrow Y$, we say that:

- f is injective $\Rightarrow f(x) = f(y)$ then $x = y$
- f is surjective $\Rightarrow \{f(x) : x \in X\}$ is the whole of Y
- f is bijective \Rightarrow it is both injective and surjective

$$N = \{0, 1, 2, \dots\}, Z = \{\dots, -2, -1, 0, 1, 2, \dots\}$$

$N \subset Z$ inclusion

$f: N \rightarrow Z, f(x) = [x]$ is injective but not surjective

We look at a different map, $g: N \rightarrow Z$, which sends odd numbers to the positive integers and sends the even numbers to the negative integers, ie $0 \rightarrow 0, 1 \rightarrow -1, 2 \rightarrow 1, 3 \rightarrow -2, \dots$

Definition: If there exists $f: X \rightarrow Y$ injective then we say that $|X| \leq |Y|$, where $|X|$ denotes the cardinality of the set

If $|X| \leq |Y|$ and $|Y| \leq |X|$, then we say that $|X| = |Y|$ (in part if $g: X \rightarrow Y$ is bijective then $|X| = |Y|$)

$$N^+ = \{1, 2, 3, \dots\}, N^+ \subset N$$

We can find a bijection $N^+ \rightarrow N$

$$x \mapsto x-1$$

$$1 \rightarrow 0$$

$$2 \rightarrow 1$$

$$3 \rightarrow 2$$

$$g: N \rightarrow Z \begin{cases} m \mapsto -\frac{m}{2}, m \text{ is even} \\ m \mapsto \left\lceil \frac{m}{2} \right\rceil, m \text{ is odd} \end{cases}, \text{ where } \lceil x \rceil \text{ denotes the closest integer greater than } x$$

$$g^{-1}: Z \rightarrow N \begin{cases} m \mapsto -2|m|, m \text{ is negative} \\ m \mapsto 2|m|, m \text{ is positive} \end{cases}$$

Definition: An enumeration or a counting scheme of X is a bijective mapping from N to X

$$X \sim Y \text{ if } |X| = |Y|$$

- $X \sim X$ reflexivity
- $X \sim Y \Rightarrow Y \sim X$ symmetry
- $X \sim Y, Y \sim Z \Rightarrow X \sim Z$ transitivity

What is the cardinality of \mathbb{Q} ?

The rationals are dense in \mathbb{R} so we can get as close as we want to any $r \in \mathbb{R}$ with a rational number

We denote the positive rationals by \mathbb{Q}^+

Lectures on Boolean Algebras Paul R. Halmos, 2018-09-12 This presentation on the basics of Boolean algebra has ranked among the fundamental books on this important subject in mathematics and computing science since its initial publication in 1963 Concise and informal as well as systematic the text draws upon lectures delivered by Professor Halmos at the University of Chicago to cover many topics in brief individual chapters The approach is suitable for advanced undergraduates and graduate students in mathematics Starting with Boolean rings and algebras the treatment examines fields of sets regular open sets elementary relations infinite operations subalgebras homomorphisms free algebras ideals and filters and the homomorphism theorem Additional topics include measure algebras Boolean spaces the representation theorem duality for ideals and for homomorphisms Boolean measure spaces isomorphisms of factors projective and injective algebras and many other subjects Several chapters conclude with stimulating exercises the solutions are not included [Lectures on Random Interfaces](#) Tadahisa Funaki, 2016-12-27 Interfaces are created to separate two distinct phases in a situation in which phase coexistence occurs This book discusses randomly fluctuating interfaces in several different settings and from several points of view discrete continuum microscopic macroscopic and static dynamic theories The following four topics in particular are dealt with in the book Assuming that the interface is represented as a height function measured from a fixed reference discretized hyperplane the system is governed by the Hamiltonian of gradient of the height functions This is a kind of effective interface model called interface model The scaling limits are studied for Gaussian or non Gaussian random fields with a pinning effect under a situation in which the rate functional of the corresponding large deviation principle has non unique minimizers Young diagrams determine decreasing interfaces and their dynamics are introduced The large scale behavior of such dynamics is studied from the points of view of the hydrodynamic limit and non equilibrium fluctuation theory Vershik curves are derived in that limit A sharp interface limit for the Allen Cahn equation that is a reaction diffusion equation with bistable reaction term leads to a mean curvature flow for the interfaces Its stochastic perturbation sometimes called a time dependent Ginzburg Landau model stochastic quantization or dynamic P model is considered Brief introductions to Brownian motions martingales and stochastic integrals are given in an infinite dimensional setting The regularity property of solutions of stochastic PDEs SPDEs of a parabolic type with additive noises is also discussed The Kardar Parisi Zhang KPZ equation which describes a growing interface with fluctuation recently has attracted much attention This is an ill posed SPDE and requires a renormalization Especially its invariant measures are studied

Measure-Valued Solutions for Nonlinear Evolution Equations on Banach Spaces and Their Optimal Control N. U. Ahmed, Shian Wang, 2023-09-12 This book offers the first comprehensive presentation of measure valued solutions for nonlinear deterministic and stochastic evolution equations on infinite dimensional Banach spaces Unlike traditional solutions measure valued solutions allow for a much broader class of abstract evolution equations to be addressed providing a broader

approach The book presents extensive results on the existence of measure valued solutions for differential equations that have no solutions in the usual sense It covers a range of topics including evolution equations with continuous discontinuous vector fields neutral evolution equations subject to vector measures as impulsive forces stochastic evolution equations and optimal control of evolution equations The optimal control problems considered cover the existence of solutions necessary conditions of optimality and more significantly complementing the existing literature This book will be of great interest to researchers in functional analysis partial differential equations dynamic systems and their optimal control and their applications advancing previous research and providing a foundation for further exploration of the field
