

- A machine shop is a workshop where powerful machine tools are used to cut, shape, drill, and finish metals, plastics, glass, and wood. Machining refers to the creation of a useful component (such as an engine block) from raw materials (such as a block of aluminum).
- The processes carried out in machine shops are some of the fundamental processes necessary for the functioning of an industrialized society.
- While there are a number of more specialized machine shop processes that are specific to certain industries, there are a few fundamental machine shop processes that are common to most machine shops. Here are descriptions of some of those basic machine shop processes.
