the event contributing over 130 papers in total Among the keynote speakers are internationally renowned scholars in translation studies such as Dr Roberto Valde n professor of English Linguistics at the University of Oviedo Spain and the Chief Editor of Perspective Studies in Translatology Dr Sun Yifeng chair professor of Translation Studies and head of the English Department at the University of Macau Dr Tan Zaixi distinguished professor of Shenzhen University and Chair Professor of Beijing Foreign Studies University and Professor Emeritus of Hong Kong Baptist University After careful evaluation and compilation 90 papers have been selected for this conference proceedings which was summarized into the following four topics Translation and Interpreting Theory and Practice Translation and Cross cultural Studies Evaluation of Translation and Interpretation and Studies on the Teaching of Translation By no means is it difficult to find some interesting and thought provoking papers under each topic For example concerning Translation and Interpreting Theory and Practice To Translate or not to Translate That is the Question On Metaphor Translation in Chinese Political works by Dong Yu explains that in judging whether or not a Chinese metaphor can be translated into English an indispensable step is to decide whether or not the two cultural connotations can be connected But this can easily be influenced by subjective factors Yu has suggested some ways in which subjective factors could be controlled to some extent so that the translator could be more confident in his or her decision He has also suggested three steps The first step is to assume that the cultural connotation of the Chinese metaphor can be connected with that of its English version For example the metaphor in could be translated as rain or shine The second step is to find out whether or not this translated version is acceptable both linguistically and culturally in English The third step is to consider the systematicity of the metaphor in regard with the context in both the source and target texts This involves a process of recontextualization When it comes to Translation and Cross cultural Studies On Translation of the English Guide interpreter from the Perspective of Intercultural Communication by Fengxia Liua and Xiaoning Bi points out that inbound tourism serves as a window through which foreign tourists get to know China so the interaction between the guide interpreters and foreign tourists are the typical activity of cultural communication Foreign language speaking guides are usually regarded as people to people ambassadors or cultural ambassadors who have played an essential role in the international tourist industry Therefore they argue that it is extremely important for tourist guides to cultivate their cross cultural communication awareness enhance their overall communicative competence observe and distinguish east and west differences with multi dimensional perspective transcend cultural barriers and learn to use translation skills Studies on the Teaching of Translation is another interesting topic that has attracted enormous attention such as Business Translation Teaching from the Perspective of Metaphors by Dandan Li which explores application of conceptual metaphor theory in the translation process of business lexicons business discourse and business English culture so as to provide a new perspective in business English pedagogy Another study entitled Cognitive Studies in Translation by Xin Huang analyzes the cognitive studies of translation interpreting processes over the past three decades with focus on the

issues examined the findings reached as well as the recent development She explains that cognitive studies of translation process examine the translation competence on line translation behaviors such as how the eye gazes and how the words are typed and the brain activities when doing translation Special interests are paid to the working memory problem solving the executive function and some linguistic relative factors such as text difficulty Over the past thirty years the interest in the field has been gaining considerable momentum and increasing issues have been involved Finally she concludes that with the advancement of technologies and interdisciplinary approaches the black box the previously unforeseeable cognitive activities of how human process translation can be unfolded Considering the importance of integrating theory with practice the proceedings are therefore compiled in such a way as to be balanced and inclusive in the hope of summarizing current accomplishments as well as providing certain insights for teaching and further research in the field of translation and interpretation studies
