Build Neural Network With MS Excel , **Hands-on Machine Learning with Microsoft Excel 2019** Julio Cesar Rodriguez Martino,2019 *Learn Data Mining Through Excel* Hong Zhou,2020-06-13 Use popular data mining techniques in Microsoft Excel to better understand machine learning methods Software tools and programming language packages take data input and deliver data mining results directly presenting no insight on working mechanics and creating a chasm between input and output This is where Excel can help Excel allows you to work with data in a transparent manner When you open an Excel file data is visible immediately and you can work with it directly Intermediate results can be examined while you are conducting your mining task offering a deeper understanding of how data is manipulated and results are obtained These are critical aspects of the model construction process that are hidden in software tools and programming language packages This book teaches you data mining through Excel You will learn how Excel has an advantage in data mining when the data sets are not too large It can give you a visual representation of data mining building confidence in your results You will go through every step manually which offers not only an active learning experience but teaches you how the mining process works and how to find the internal hidden patterns inside the data What You Will Learn Comprehend data mining using a visual step by step approach Build on a theoretical introduction of a data mining method followed by an Excel implementation Unveil the mystery behind machine learning algorithms making a complex topic accessible to everyone Become skilled in creative uses of Excel formulas and functions Obtain hands on experience with data mining and Excel Who This Book Is For Anyone who is interested in learning data mining or machine learning especially data science visual learners and people skilled in Excel who would like to explore data science topics and or expand their Excel skills A basic or beginner level understanding of Excel is recommended **Automated Deep Learning Using Neural Network Intelligence** Ivan Gridin,2022 Optimize develop and design PyTorch and TensorFlow models for a specific problem using the Microsoft Neural Network Intelligence NNI toolkit This book includes practical examples illustrating automated deep learning approaches and provides techniques to facilitate your deep learning model development The first chapters of this book cover the basics of NNI toolkit usage and methods for solving hyper parameter optimization tasks You will understand the black box function maximization problem using NNI and know how to prepare a TensorFlow or PyTorch model for hyper parameter tuning launch an experiment and interpret the results The book dives into optimization tuners and the search algorithms they are based on Evolution search Annealing search and the Bayesian Optimization approach The Neural Architecture Search is covered and you will learn how to develop deep learning models from scratch Multi trial and one shot searching approaches of automatic neural network design are presented The book teaches you how to construct a search space and launch an architecture search using the latest state of the art exploration strategies Efficient Neural Architecture Search ENAS and Differential Architectural Search DARTS You will learn how to automate the construction of a neural network architecture for

a particular problem and dataset The book focuses on model compression and feature engineering methods that are essential in automated deep learning It also includes performance techniques that allow the creation of large scale distributive training platforms using NNI After reading this book you will know how to use the full toolkit of automated deep learning methods The techniques and practical examples presented in this book will allow you to bring your neural network routines to a higher level What You Will Learn Know the basic concepts of optimization tuners search space and trials Apply different hyper parameter optimization algorithms to develop effective neural networks Construct new deep learning models from scratch Execute the automated Neural Architecture Search to create state of the art deep learning models Compress the model to eliminate unnecessary deep learning layers *Applied Neural Networks with TensorFlow 2* Orhan Gazi Yalçın,2021 Implement deep learning applications using TensorFlow while learning the why through in depth conceptual explanations You ll start by learning what deep learning offers over other machine learning models Then familiarize yourself with several technologies used to create deep learning models While some of these technologies are complementary such as Pandas Scikit Learn and Numpy others are competitors such as PyTorch Caffe and Theano This book clarifies the positions of deep learning and Tensorflow among their peers You ll then work on supervised deep learning models to gain applied experience with the technology A single layer of multiple perceptrons will be used to build a shallow neural network before turning it into a deep neural network After showing the structure of the ANNs a real life application will be created with Tensorflow 2 0 Keras API Next you ll work on data augmentation and batch normalization methods Then the Fashion MNIST dataset will be used to train a CNN CIFAR10 and Imagenet pre trained models will be loaded to create already advanced CNNs Finally move into theoretical applications and unsupervised learning with auto encoders and reinforcement learning with tf agent models With this book you ll delve into applied deep learning practical functions and build a wealth of knowledge about how to use TensorFlow effectively You will Compare competing technologies and see why TensorFlow is more popular Generate text image or sound with GANs Predict the rating or preference a user will give to an item Sequence data with recurrent neural networks
