Fundamental Mathematical Modeling of Additive Manufacturing Juha Jeronen, Tero Tuovinen, Matti Kurki, 2023-12-07 This book elucidates the fundamental thermomechanical behaviour inherent in the 3D printing process within a laser based powder bed fusion L PBF system It presents foundational concepts and provides in depth derivations of the governing equations The analysis encompasses arbitrary anisotropic linear viscoelastic materials accounting for thermal effects The authors leverage the theory of axially moving materials a framework previously employed in the analysis of production processes within the process industry They introduce a coordinate frame that moves in tandem with the printing laser adopting an Eulerian perspective towards the in motion solid Designed for graduate students and researchers this book is poised to foster a profound comprehension and spur innovative technological advancements in the realm of additive manufacturing

Optimization Methodologies for the Automatic Design of Switched-Capacitor Filter Circuits for IoT Applications Hugo Serra, Rui Santos-Tavares, Nuno Paulino, 2022-09-23 This book discusses the design of switched capacitor filters in deep submicron CMOS technologies The authors describe several topologies for switched capacitor filter circuits that do not require high gain high bandwidth amplifiers Readers will also learn two analysis methodologies that can be implemented efficiently in software and integrated into optimization environments for the automation of design for switched capacitor filters Although the optimization examples discussed utilize low gain amplifiers the demonstrated methodologies can also be used for conventional high gain high bandwidth amplifiers
