Keywords: Hotel Management; System Modeling; Demand Analysis; Database; Design.

Abstract. In order to make the hotel management work systematic, standardization and automation, achieve the aim of improving the efficiency of hotel guest room management. This paper designs the hotel management system, the overall mission of system development is to make the office staff can quickly and easily complete the hotel guest room management task. From the Angle of actual application to system illustrate the basic situation; And then introduced the system analysis and modeling, focusing on the functional requirements of the hotel management system was analyzed, at the same time on the system design goal, the system use case diagram and so on several aspects, Hotel management system is mainly introduced the three layers of frame structure, and the database design, etc. Application of this system can be flexibly and conveniently on the computer management hotel rooms, thus greatly improves the processing speed, make the management more modern.

Introduction

Hotel industry is facing the increasingly fierce competitive environment, on the one hand, the traditional hotel industry is difficult to get rid of low prices, low occupancy rate and low profit "three low" strange circle; Study hotel management in the information service, room information query, booking and management functions, for business processes effective integration of hotel management, complete information sharing in the process of management, to provide customers with convenient and efficient hotel service. Through this system can be in the hotel customers, service personnel, managers and owners to bridge the interconnection, the full application of information management technology, combined with the actual business, improving hotel service quality, standardized service standards.

The Requirements Analysis of System Functional

Hotel management system is mainly used in the hotel daily information set, entry and query, at the same time in between customers, waiter, administrators, owners set up an interactive platform for the visit [1]. In terms of data query, for system administrators, who will take care of the hotel guest room information, passenger occupancy, statistics and analysis for all kinds of other information to customize the query, to complete the manual monitoring functions of the database data [2]. In terms of database maintenance, meet the demand of system administrators to database daily management, mainly to the local database system for management and custom, including the management of the data table, guest room data change, passenger check-in information input and rate data calculation, etc [3].

The Customer Information Management Needs. Customer information management is through the in-depth analysis of customer information, to improve customer satisfaction, so as to enhance the enterprise the competitive ability. Goal is to reduce sales cycle and cost of sales, increase their income, seeking to expand business for new markets and channels, and improve customer value, satisfaction, profitability and loyalty.

The Hotel Information Management Needs. The hotel information management includes the following functional requirements, such as personnel information related to maintenance, counter management, building management and business information management and analysis, etc [4].
