

## 4th year Projects: Progress (or Preliminary) Report

At the end of the first semester of your project work, you usually need to present a report of your progress to date. You also need to present the plan of the work you will do to complete the project in the second semester. This plan is sometimes very similar to the plan that you presented in your Project Proposal at the beginning of the project; at other times you will need to revise the plan based on the first semester work.

### Requirements

---

Different departments have different requirements for the progress report, so that the guidelines presented here are general in nature. You must always check the particular requirements of your department so that you can then apply these guidelines successfully.

The **length** of the Progress Report varies from department to department. For example in Mechanical Engineering, the length is about 2000 words, while in Civil Engineering the preliminary report is a maximum of 5,000 words. In some departments you may be required to prepare a poster presentation rather than a report to outline your progress during the first semester.

### Purpose

---

The **purpose** of the progress report is:

- to summarise the work you have already completed in the first semester, and
- to outline in detail the work you will carry out during the second semester in order to realise the objectives of the project.

### Format

---

The **format** of the Progress Report is formal report format. Typical **sections** in a progress report and their **contents** are outlined below.

## Sample Progress Report About Engineering:

**Writing Like An Engineer** Dorothy A. Winsor, 2013-11-05 Comprised of a study spanning over five years this text looks at four engineering co op students as they write at work Since the contributors have a foot in both worlds work and school the book should appeal to people who are interested in how students learn to write as well as people who are interested in what writing at work is like Primarily concerned with whether engineers see their writing as rhetorical or persuasive the study attempts to describe the students changing understanding of what it is they do when they write Two features of engineering practice that have particular impact on the extent to which engineers recognize persuasion are identified a reverence for data and the hierarchical structure of the organizations in which engineering is most commonly done Both of these features discourage an open recognition of persuasion Finally the study shows that the four co op students learned most of what they knew about writing at work by engaging in situated practice in the workplace rather than by attending formal classes
