INDUSTRIAL ECOLOGY - TERM PROJECT

A Design Project and Case Study

For the design project and case study, you are required to form teams of five students. Each group will select one of the following existing products:

- Office chair
- Desk telephone
- Bench
- Coffee maker
- Hand saw
- Vacuum domestic cleaner

and analyse its eco-efficiency using the knowledge and skills you will acquire during the course. The task comprises four key steps:

1. **Inventory:**
2. **Analysis of materials, energy and resources used to produce and produce use.**
3. **Problem-solving.**
4. **Suggestions for improvements of technical, user and eco performance.**

Because the term project involves real-world activities, students should expect that there will be gaps in information needed on their topic, and that the criteria used to make recommendations may be ambiguous. Teams are expected to take full account of the uncertainty of their recommendations by highlighting data gaps and the uncertainty of recommendations in assumptions. In actual practice, analyses which highlight gaps in information, identify critical assumptions, and place bounds around a possible answer are often just as useful as analyses which are able to provide clear-cut solutions. Consequently, teams will be evaluated on the thoroughness and creativity of their analyses and recommendations.

Design Project Milestone and Final Report Requirements

In a written report of 11 to 20 pages (A4 students), the report may be shorter and only needs to cover the subjects covered in class – single spaced, font size 12pt or Times New Roman minimum 11pt, figures and tables included, appropriate with one data, one multi-column, one and references are included in page number – each group of students presents answers to the case design questions relevant to their particular case study. Drawings may be hand drawn or computer generated, and should demonstrate good engineering practice. The report should include an abstract, introduction, product and component description, detailed list of assumptions, case design requirements and materials selection
