17- **Body Awareness**

- **Body awareness:** an individual's ability to recognize where their body is in space (a result of a person's heightened self-awareness)
- **Types of body awareness:**
 - **Interoception awareness** - one's sense of their internal systems (emotional included) and their effect on the body
 - Ex. fullness after eating, nausea, etc.
 - **Proprioception awareness** - one's ability to understand how a person's body is positioned without directly looking at it, also helps an individual understand the force with which they should move
 - Proprioceptive sense continuously provides information to the brain as to the position, location, orientation and movement of the body - also involves the inner ear specifically (involved in our balance)
 - Ex. knowing how far to reach for a cupboard
 - Scientists believe that *phantom limb syndrome* is caused by memories of the proprioceptive nerves in the brain and body that still remain.
 - **Spatial awareness** - one's ability to understand their body's position within space, helps one move through an area in relation to other objects
- **Development of body awareness:**
 - **Fine motor development** - the growth and development of the small muscles in the body (ex. fingers)
