*Men age like wine, women age like milk. On the differing evaluation of aging (and body size) depending on gender* Michelle Paul,2026-02-18 Essay from the year 2025 in the subject Gender Studies grade 1 0 University of Rome La Sapienza ITALIANO DI STUDI ORIENTALI course Culture Gender Media language English abstract The essay Men age like wine women age like milk On the differing evaluation of aging and body size depending on gender examines how gendered double standards shape the social evaluation of aging and body size in contemporary media culture Using a popular internet meme comparing Tom Cruise and Kelly McGillis in 1986 and 2022 as a case study the analysis explores how men s aging is culturally framed as dignified and attractive while women s aging and weight gain are treated as signs of failure and decline The theoretical framework draws on Susan Sontag s concept of the double standard of aging Sylvia Walby s theory of patriarchy Rozanova s discourse of successful aging and Taylor and Hoskin s work on the intersection of fatness and femininity These perspectives situate the meme within broader patriarchal structures that systematically privilege men while subjecting women to intensified bodily surveillance and aesthetic expectations The analysis demonstrates that aging is not treated as a neutral biological process but as a socially evaluated marker of worth In Western media culture successful aging is associated with youthfulness productivity and self control However these expectations are gendered masculinity is linked to competence and authority qualities that are not undermined by age whereas femininity is culturally tied to youthfulness and thinness As a result women s aging is interpreted as a loss of value The meme reinforces this logic by presenting Cruise s aging as natural and respectable while McGillis s visible aging and weight gain are implicitly framed as personal shortcomings Body size intensifies this inequality The essay argues that femininity is culturally constructed as small controlled and visually pleasing meaning that larger female bodies are read as excessive and undisciplined In this way aging and fatness intersect as mechanisms of gendered control The meme though seemingly humorous functions as a vehicle for circulating and normalizing patriarchal standards By presenting its message through minimal text and visual contrast it frames gendered bias as common sense Ultimately the essay concludes that such memes are not harmless jokes but cultural artifacts that reproduce structural inequalities They contribute to a broader system in which women s worth is tied to youth and thinness while

Survey of College Students 2025, Use of College Instruction about Generative AI Primary Research Group,2025-02-12 The study looks at how students are engaging with generative AI through institutional resources The study details use of courses websites online tutorials and other means to learn about how to use generative artificial intelligence The survey highlights the varying levels of usage and the reliance on formal and informal learning methods among college students Results are based on a 2025 representative survey of 1022 students at 4 year colleges and research universities in the USA Jus a few of this 155 page report s many findings are that 30 14% of students have used academic resources provided by their institution to learn about generative AI Students at higher cost institutions 20 000 are more likely 36 03% to use academic resources compared to those at lower cost institutions 27 34% Private school students 35 90% are significantly more likely to use resources compared to public school students 28 43% International students were more avid users than domestic students of college instructional resources about generative AI Student complaints about being unable to find

information about how to use AI were quite common. Students face challenges such as lack of awareness, institutional discouragement, and unclear policies on AI use. They express a need for more structured education, clear guidelines, and greater access to AI tools. The survey suggests that while institutional resources for learning about generative AI exist, most students rely on informal methods such as peers, AI tools, and online content. There is a clear need to expand structured AI education to better support student learning.
