Atomic Days Joshua Frank,2022-10-11 Once home to the United States s largest plutonium production site the Hanford Nuclear Reservation in Washington state is laced with 56 million gallons of radioactive waste The threat of an explosive accident at Hanford is all too real an event that could be more catastrophic than Chernobyl The EPA designated Hanford the most toxic place in America it is also the most expensive environmental clean up job the world has ever seen with a 677 billion price tag that keeps growing Huge underground tanks well past their life expectancy and full of boiling radioactive gunk are leaking infecting groundwater supplies and threatening the Columbia River Whistleblowers worried that the worst is ahead are now speaking out begging to be heard and hoping their pleas help bring attention to the dire situation at Hanford Aside from a few feisty community groups and handful of Indigenous activists there is very little public scrutiny of the clean up process which is managed by the Department of Energy and carried out by contractors with shoddy track records like Bechtel In the context of renewed support for atomic power as a means of combating climate change Atomic Days provides a much needed refutation of the myths of nuclear technology from weapons to electricity and shines a spotlight on the ravages of Hanford and its threat to communities workers and the global environment *Plummer v.*
