subjected practice procedures to the rigor of research and evaluation This blending of clinical practice and research develops the sense of competence that student practitioners acquire in understanding and controlling both the art and science of their clinical practice Steven Schinke and his colleagues offer a series of snapshots of important work in process Their collective portrait provides a fresh perspective and new stimulus for all social work practice as well as an affirmation that disciplined responsive and sensitive social work intervention can make a difference in the lives of people *Behavioral Treatment of Alcoholism* Peter Michael Miller,1976 **Behavior Modification** William H.
