**Behavior Modification** Garry Martin, Joseph J. Pear, 2015-10-02 Behavior Modification 10 e assumes no specific prior knowledge about psychology or behavior modification on the part of the reader The authors begin with basic principles and procedures of behavior modification and then provide readers with how to skills such as observing and recording Next the authors provide advanced discussion and references to acquaint readers with some of the empirical and theoretical underpinnings of the field Readers will emerge with a thorough understanding of behavior modification in a wide variety of populations and settings Instructor's Manual with Tests, Fourth Edition, "Behavior Modification: what it is and how to Do It" Garry Martin, Joseph Pear Garry Martin, 1992

**The Science of Learning** Joseph J. Pear, 2016-03-02 For over a century and a quarter the science of learning has expanded at an increasing rate and has achieved the status of a mature science It has developed powerful methodologies and applications The rise of this science has been so swift that other learning texts often overlook the fact that like other mature sciences the science of learning has developed a large body of knowledge The Science of Learning comprehensively covers this knowledge in a readable and highly systematic manner Methodology and application are discussed when relevant however these aspects are better appreciated after the reader has a firm grasp of the scientific knowledge of learning processes Accordingly the book begins with the most fundamental and well established principles of the science and builds on the preceding material toward greater complexity The connections of the material with other sciences especially its sister science biology are referenced throughout Through these frequent references to biology and evolution the book keeps in the forefront the recognition that the principles of learning apply to all animals Thus in the final section the book brings together all learning principles studied in research settings by demonstrating their relevance to both animals and humans in their natural settings For animals this is the untamed environment of their niches for humans it is any social environment for Homo sapiens is the social and learning animal par excellence *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1982
