Quality in the Era of Industry 4.0 Kai Yang, 2024-01-04 QUALITY IN THE ERA OF INDUSTRY 4 0 Enables readers to use real world data from connected devices to improve product performance detect design vulnerabilities and design better solutions Quality in the Era of Industry 4 0 provides an insightful guide to harnessing user performance and behavior data through AI and other Industry 4 0 technologies This transformative approach enables companies to not only optimize products and services in real time but also to anticipate and mitigate likely failures proactively In a succinct and

lucid style the book presents a pioneering framework for a new paradigm of quality management in the Industry 4.0 landscape. It introduces groundbreaking techniques such as utilizing real world data to tailor products for superior fit and performance, leveraging connectivity to adapt products to evolving needs and use cases, and employing cutting edge manufacturing methods to create bespoke, cost effective solutions with greater efficiency. Case examples featuring applications from the automotive, mobile device, home appliance, and healthcare industries are used to illustrate how these new quality approaches can be used to benchmark the product's performance and durability, maintain smart manufacturing, and detect design vulnerabilities. Written by a seasoned expert with experience teaching quality management in both corporate and academic settings, *Quality in the Era of Industry 4.0* covers topics such as: Evolution of quality through industrial revolutions from ancient times to the first and second industrial revolutions; Quality by customer value creation, explaining differences in producers, stakeholders, and customers in the new digital age along with new realities brought by Industry 4.0; Data quality dimensions and strategy, data governance, and new talents and skill sets for quality professionals in Industry 4.0; Automated product lifecycle management, predictive quality control, and defect prevention using technologies like smart factories, IoT, and sensors. *Quality in the Era of Industry 4.0* is a highly valuable resource for product engineers, quality managers, quality engineers, quality consultants, industrial engineers, and systems engineers who wish to make a participatory approach towards data driven design, economical mass customization, and late differentiation. [Understanding Expert Systems](#) Mary Jackson, 1992-06-09. Expert systems are being used increasingly to model knowledge that cannot be represented by conventional programming. Gives a rounded appreciation of what expert systems can offer. Chen, 2025-08-07. In the wake of the COVID-19 pandemic, the convergence of Artificial Intelligence (AI), Big Data, and in silico simulation has emerged as a cornerstone in pandemic surveillance and public health informatics. The integration of these disciplines is creating powerful tools for real-time data analysis, predictive modelling, and virtual simulations of disease dynamics. It facilitated real-time decision making, optimized resource allocation, and enhanced disease surveillance. This transformative period witnessed AI's potential to reshape public health strategies, emphasizing its significance in future epidemic preparedness. The primary objective of this Research Topic is to collate groundbreaking research and critical reviews that highlight AI's contributions during the COVID-19 era and its implications for future epidemic strategies. We aim to foster a comprehensive understanding of the pivotal AI-driven methodologies in the pandemic response and how these innovations can be harnessed for future health crises. By synthesizing lessons learned and charting the trajectory of AI and

big data ecosystems in epidemic management this issue seeks to provide a roadmap for integrating AI more seamlessly into global health strategies ensuring that we are better equipped to tackle subsequent outbreaks with agility and precision This call for papers invites submissions that not only recognize the pivotal role of AI during the COVID 19 crisis but also expand on how AI when coupled with Big Data and in silico approaches can revolutionize our preparedness and response to future public health emergencies We are seeking groundbreaking research and insightful reviews that Demonstrate AI s role in synthesizing Big Data for pandemic forecasting and real time surveillance Illustrate the impact of AI driven simulations in understanding and managing epidemic spread Detail the applications of AI in enhancing public health informatics and data driven decision making Showcase in silico modelling as a tool for strategic resource distribution and policy formulation Explore AI s capacity to integrate with Big Data for robust epidemiological monitoring Investigate the use of AI and Big Data to provide mental health support during health crises Examine how AI and Big Data can promote healthcare equity especially in underserved areas Address the ethical implications of employing AI and simulation in public health strategies Discuss the interplay between AI Big Data and in silico techniques in strengthening digital health innovations The areas of interest comprise but are not restricted to AI driven early warning mechanisms and risk evaluation AI and big data ecosystems in advancing public health analytics and research AI enhanced resource distribution and strategic decision making AI s role in epidemiological monitoring and epidemic control AI s application in crisis intervention and humanitarian assistance AI s contribution to mental well being and psychological aid during emergencies AI s potential to ensure health parity and healthcare accessibility in underserved regions The ethical legal and societal dimensions of AI s integration in global health and epidemic response The synergy of AI with other digital health innovations during health crises Our aim is to compile a comprehensive volume that not only emphasizes the technological prowess of AI but also its practical deployment in conjunction with Big Data and in silico methods to offer a more nuanced effective and equitable global health response We encourage contributions that provide not just theoretical frameworks but also empirical evidence of the benefits and challenges of these integrated approaches in public health domains

Innovative Teaching and Learning in Health

Education and Promotion María Dolores Ruiz Fernández, Emilia Isabel Martins Da Costa, Isabel María Fernández Medina, Maria Del Mar Jimenez Lasserrotte, Maria Isabel Ventura-Miranda, 2026-02-06 Our focus for this research topic is the intriguing and ever evolving landscapes of health pedagogy This realm a convergence of education healthcare and public engagement remains paramount to fostering knowledgeable communities equipped to navigate health related intricacies Traditional teaching methodologies have played a seminal role providing a robust foundation in this sphere with lectures seminars and experiential learning forming crucial pillars of health education However as global health landscapes shared and individual health needs transform rapidly it becomes critical that our approaches to health education and promotion keep pace This begs a closer look into burgeoning teaching innovations and insightful learning approaches designed to

advance health promotion This research topic aims to illuminate fresh transformative and impactful pedagogical strategies in the realm of health education for the public and health professionals alike More specifically it seeks to spotlight ways that technology coupled with innovative pedagogical thought is revolutionizing health education and promotion For instance the adoption of virtual or augmented reality for simulated patient experiences shows promise in fostering empathy and acuity in medical students Likewise online platforms and digital gamification have extended the walls of traditional classroom providing flexible personalized learning environments While these strides have been monumental gaps exist in comprehensively understanding their effectiveness standardizing their application and guaranteeing their access across diverse contexts This research topic intends to stir discourse around these areas uncovering strategies to guide future development and deployment of innovations in health education In pursuit of a comprehensive exploration of this thematic sphere we welcome research submissions delineating a range of topics Manuscripts could explore the efficacy of innovative teaching methods in enhancing learners comprehension retention and application of health knowledge We are interested in evaluations of existing digital educational platforms in health promotion exploring their scope accessibility adaptability and impact on learning outcomes Studies comparing traditional and contemporary teaching methods in terms of efficiency outcomes and acceptance would provide insightful perspectives Contributions may also delve into health literacy and its correlation with different teaching and learning modalities Lastly research uncovering barriers to implementing innovative teaching methods in diverse educational settings along with propositions to overcome these would be invaluable We ultimately aim to stitch together a rich tapestry of discourse research and innovation catalyzing the enrichment of health education and promotion for the public and health professionals Papers that are based on the education of health professionals should be submitted to *Frontiers in Medicine Healthcare Professions Education*
