Dos & don'ts of a good night's sleep

Do:	
✓	Go to bed and get up at the same time every day. This will reinforce your body's sleep-wake cycle.
✓	Create a restful environment: dark and quiet. Use blackout curtains and earplugs.
✓	Set a soothing temperature for sleeping: the best temperature is 60 to 67 °F (15 to 20 °C).
✓	Invest in a quality mattress and bedding. Your sheets and bedding should be comfortable.
✓	Get enough physical activity earlier in the day. Regular exercise makes it easier to fall asleep.
✓	Try mindfulness techniques to quiet your brain. Use breathing exercises to relax.

Don't:	
✗	Take your phone or other devices to bed. Blue light delays the release of melatonin.
✗	Eat large meals before bedtime. This might keep you up and cause weight gain.
✗	Use stimulants like caffeine or nicotine in the evening. They stay in the body for up to 5 hours.
✗	Drink alcohol close to bedtime. It decreases sleep quality by increasing awakenings.
✗	Use your bed for studies, work, or other activities. It is for sleeping.
✗	Exercise in the evening. Finish your workout at least 3 hours before you go to bed.

The Herald of Health, 1877 **Behavioral Management Guide** Muriel Warren, 2002 Now more than ever therapists need the time and energy to heal their young clients. Rather than prove on paper that they need healing, we need to single out what is important and look for clear, solution-focused answers in the here and now. We must help our children learn how to live with the fear and uncertainty of today's world and provide them with the tools to deal with stress. The Behavioral Management Guide is designed to help therapists develop comprehensive treatment plans for the disorders of every child they are working with, including Post-Traumatic Stress Disorder, Critical Incident Stress, and Bereavement. For example, it offers therapists guidelines for helping patients avoid hazards when grieving and using a self-actualization/developmental model to rise from the ashes of grief. This book ensures a smooth relationship with behavioral case managers. It will not only help in generating optimal treatment certification and authorization for your clients, but will help in the everyday task of writing chart notes, which most practitioners despise but are required by state law and the regulations of managed care companies. This manual will help the therapist document everything from the first phone call to the final discharge summary. Using this book as a guide, all a practitioner now needs to do for each client is to diagnose the problem, copy the treatment plan from the book, and place it in the client's chart. It's all there: the behavioral symptoms, other diagnostic possibilities, the objectives of treatment, and short-term behavioral goals, as well as the therapist's interventions to meet them. The plan even includes space to enter a summary of the session with room for your signature, as required, at the bottom of each page.
