

AP Statistics – Chapter 13 Practice Free Response Test

1. In a study of heart surgery, one issue was the effect of drugs called beta-blockers on the pulse rate of patients during surgery. The available subjects were divided at random into two groups of 30 patients each. One group received a beta-blocker; the other group received a placebo. The pulse rate of each patient at a critical point during the operation was recorded. The treatment group had mean 65.2 and standard deviation 7.8. For the control group, the mean was 70.3 and the standard deviation was 8.3.

Perform an appropriate significance test to see if beta-blockers reduce the pulse rate.

- a. Identify the populations and parameters of interest. Then state hypotheses.
 - b. State and verify conditions for carrying out a significance test.
 - c. Calculate the test statistic and the P -value.
 - d. What conclusion would you draw?
2. A study of “adverse symptoms” in users of over-the-counter pain relief medications assigned subjects at random to one of two common pain relievers: acetaminophen and ibuprofen. In all, 650 subjects took acetaminophen, and 44 experienced some adverse symptom. Of the 347 subjects who took ibuprofen, 49 had an adverse symptom. We want to assess the evidence that the two pain relievers differ in the proportion of people who experience an adverse symptom.

Perform an appropriate significance test to answer the question posed.

- a. Identify the populations and parameters of interest. Then state hypotheses.
 - b. State and verify conditions for carrying out a significance test.
 - c. Calculate the test statistic and the P -value.
 - d. What conclusion would you draw?
3. In the 2001 regular baseball season, the World Series Champion Arizona Diamondbacks played 81 games at home and 81 games away. They won 48 of their home games and 44 of the games played away. We can consider these games as samples from potentially large populations of games played at home and away.
 - a. Identify the populations and parameters of interest.
 - b. Construct and interpret a 90% confidence interval for the difference between the proportion of games that the Diamondbacks win at home and the proportion that they win when on the road.
 - c. Most people think that it is easier to win at home than away. Use the confidence interval from part b to determine whether this is true for the Arizona Diamondbacks.

Econometric Modelling with Time Series Vance Martin, Stan Hurn, David Harris, 2013 Maximum likelihood estimation is a general method for estimating the parameters of econometric models from observed data The principle of maximum likelihood plays a central role in the exposition of this book since a number of estimators used in econometrics can be derived within this framework Examples include ordinary least squares generalized least squares and full information maximum likelihood In deriving the maximum likelihood estimator a key concept is the joint probability density function pdf of the observed random variables y_t Maximum likelihood estimation requires that the following conditions are satisfied 1 The form

of the joint pdf of y_t is known 2 The specification of the moments of the joint pdf are known 3 The joint pdf can be evaluated for all values of the parameters 9 Parts ONE and TWO of this book deal with models in which all these conditions are satisfied Part THREE investigates models in which these conditions are not satisfied and considers four important cases First if the distribution of y_t is misspecified resulting in both conditions 1 and 2 being violated estimation is by quasi maximum likelihood Chapter 9 Second if condition 1 is not satisfied a generalized method of moments estimator Chapter 10 is required Third if condition 2 is not satisfied estimation relies on nonparametric methods Chapter 11 Fourth if condition 3 is violated simulation based estimation methods are used Chapter 12 1 2 Motivating Examples To highlight the role of probability distributions in maximum likelihood estimation this section emphasizes the link between observed sample data and 4 The Maximum Likelihood Principle the probability distribution from which they are drawn Provided by publisher **Ebook: Business Statistics in Practice: Using Data, Modeling and Analytics** Bowerman, 2016-04-16 Ebook Business Statistics in Practice Using Data Modeling and Analytics *5 Steps to a 5 AP Statistics 2017* Duane C.
