Mobile Computing In Construction:

Mobile and Pervasive Computing in Construction Chimay J. Anumba,Xiangyu Wang,2012-09-04 Construction researchers and industry practitioners have begun to explore the possibilities offered by mobile and pervasive computing in architecture engineering and construction AEC It is expected that the construction industry will be keen to apply these technologies as they promise significant benefits in areas such as materials management project management distributed collaboration and information management all leading to improvements in productivity This book offers a comprehensive reference volume to the use of mobile and pervasive computing in construction Based on contributions from a mix of leading researchers and experts from academia and industry it provides up to date insights into current research topics in this field as well as the latest technological advancements and practical examples The chapters introduce the key theoretical concepts in mobile and pervasive computing and highlight the applications and solutions which are available to the construction industry More specifically the book focuses on the manner in which these technologies can be applied to improve practices in construction and related industries This book will be of particular interest to academics researchers and graduate students at universities and industrial practitioners seeking to apply mobile and pervasive computing systems to improve construction industry productivity

Using Mobile Computing for Construction Site Information Management Yuan Chen,University of Newcastle upon Tyne. School of Architecture, Planning and Landscape,2008 *Fall Prevention Through Design in Construction* Imriyas Kamardeen,2015-06-05 The role of designers has traditionally been to design a building so that it conforms to accepted local building codes The safety of workers is left up to the contractor building the designs Research shows however that designers can have an especially strong influence on construction safety during the concept preliminary and detailed design phases This book establishes the new knowledge and conceptual frameworks necessary to develop a mobile computing enabled knowledge management system that can help reduce the high rate of construction falls There are three main objectives of this book 1 To create a new Prevention through Design PtD knowledge base to model the relationships between fall risks and design decisions 2 To develop a PtD mobile App to assist building designers in fall prevention through design 3 To evaluate the practical implications of the PtD mobile App for the construction industry especially for building designers and workers The cutting edge technologies explored in this book have the potential to significantly reduce the rate of serious injuries that occur in the global construction industry This is essential reading for researchers and advanced students of construction management with an interest in safety or mobile technologies

Advances in Construction ICT and e-Business Srinath Perera,Bingunath Ingirige,Kirti Ruikar,Esther Obonyo,2017-05-08 This internationally conducted study of the latest construction industry practices addresses a broad range of Information and Communication Technology applications Drawing on research conducted in the US and UK this book presents the state of the art of various ebusiness processes and examines BIM virtual environments and mobile

technologies Innovation is a theme that runs throughout this book so in addition to the direct impact of these new technical achievements it also considers the management styles that helped them to emerge Examples from industry are illustrated with case studies and presented alongside research from some of the best known academics in this field This book is essential reading for all advanced students and researchers interested in how ICT is changing construction management and the construction industry
