

AP Biology Genetics Problems

Independent Assortment (Mendel's 2nd)

1. Sample Problem: Two pea plants self-fertilize and produce the genotypic distribution shown. Is possible that one of these a pair of genes that assort independently with a third gene? What is the genotype of each? (1 point)

2.

3. A self-fertilizing pea plant produces offspring that assort with the self when four conditions, other than the phenotypic ratios, are known. What will be the genotypic and phenotypic ratios?

They will all be self, both qualitative homozygous dominant and the other half

Interdependence

4. A pair of genes is produced by two chromosomes that assort independently. One gene is linked with a third gene on the same chromosome and the other is on a different chromosome. What would be the results?

They would be interdependent and the other half homozygous dominant

5. Two genes are on the same chromosome and assort independently. One gene is linked with a third gene on the same chromosome and the other is on a different chromosome. What will be the results of the cross? (1 point)

They will be independent and the other half

6. A pair of genes is produced by two chromosomes that assort independently. One gene is linked with a third gene on the same chromosome and the other is on a different chromosome. What will be the results?

They will be independent and the other half

7. A pair of genes is produced by two chromosomes that assort independently. One gene is linked with a third gene on the same chromosome and the other is on a different chromosome. What will be the results?

They will be independent and the other half

8. A pair of genes is produced by two chromosomes that assort independently. One gene is linked with a third gene on the same chromosome and the other is on a different chromosome. What will be the results?

They will be independent and the other half

9. A pair of genes is produced by two chromosomes that assort independently. One gene is linked with a third gene on the same chromosome and the other is on a different chromosome. What will be the results?

They will be independent and the other half

10. A pair of genes is produced by two chromosomes that assort independently. One gene is linked with a third gene on the same chromosome and the other is on a different chromosome. What will be the results?

They will be independent and the other half

11. A pair of genes is produced by two chromosomes that assort independently. One gene is linked with a third gene on the same chromosome and the other is on a different chromosome. What will be the results?
