App Development Recipes for iOS and watchOS Molly K. Maskrey,2016-06-17 App Development Recipes for iOS and watchOS explores the technical side of app development with tips and tricks to avoid those little things that become big frustrations outside of the realm of development causing many people to throw up their hands and say It s just not worth the hassle The experiential nature of this work sets it apart from other iOS and watchOS books Even if you are a developer who is completely new to Swift iOS or watchOS you ll find the right experienced based answers to important questions like Why do I need version control Why is testing so important and more specific problems directly related to iOS and watchOS development with Swift We discover and summarize the most common problems and derive the solutions not just a short answer and screenshot but a systematic

logical derivation that is how we got to the solution. After the introductory basics, each chapter delivers a problem statement and a solution. The experienced developer may, without losing anything, skip to whatever problem with which they are currently dealing. At the same time, we guide the less experienced developer through the process with focus on solving problems along the way.

What you will learn:

- iOS career options for the new developer
- Working with Source Code and Version Control
- How to work with iOS accessory devices
- Understanding development methodologies such as Agile Scrum
- User Experience Development and UI Tools
- Unit UI and Beta Testing
- Publishing your work

Who this book is for: Developers who need to find specific solutions to common problems in developing apps for iOS and watchOS.

[Building iPhone OS Accessories](#) Ken Maskrey, 2010-12-28. This book provides a serious in-depth look at Apple's External Accessory framework and the iPhone Accessories API. You'll learn how to create new integrated solutions that combine iPhone apps with dedicated hardware. The iPhone OS Accessories API expands the opportunities for innovative iPhone developers, allowing you to control and monitor external devices whether you've built them yourself or obtained them from a third party.
