

## Calculating the Half-Life of Twizzlers and M&Mium

This lesson plan includes two labs designed to teach the concept of half-life. The Twizzler lab is designed to introduce the topic and is best if used before the M&Mium lab.

### Primary Learning Outcomes

Students will learn the concept of half-life and how it relates to radioactive material. Students will determine, with a hands-on experiment, the half-life of Twizzlers and a "radioactive" element, M&Mium. Students will create and be able to recognize a graph representing the half-life of an element. Students will be able to determine how different factors modify the shape of the half-life graph.

---

### Assessed Georgia Performance Standards

SCSh4. Students will use tools and instruments for observing, measuring, and manipulating scientific equipment and materials.

SPS1. Students will investigate our current understanding of the atom.

SPS3. Students will distinguish the characteristics and components of radioactivity.

---

### Procedures/Activities (Designed to complete both labs in a 90 minute class period)

*Step 1: Duration 15-20 minutes*

Prior to class, the instructor should create partitions with 50 M&Ms each.

*Step 2 Duration: 20-30 minutes*

Students will learn the concept of half-life in the first lab to determine and the half-life of a Twizzler. Students will determine the half-life of a Twizzler in terms of number of "half-bites" and in terms of time. Students will graph the amount of Twizzler left after each "half-bite" in order to learn the shape of a half-life curve. Follow procedure outlined in lab handout.

*Step 3: Duration 50-60 minutes*

Students will determine the half-life of a "radioactive" element, M&Mium. The half-life is the number of shakes that it takes for half of the M&Mium atoms to decay. Students will plot the data and determine the half-life of M&Miums. Follow procedure outlined in lab handout.

---

### Materials and Equipment

Per student/group: 2 individually wrapped Twizzlers, 50 M&Ms, plastic cup, white paper, graph paper

### Total Duration

Teacher prep: 15-20 minutes

In class: 80-90 minutes

### Assessment

Students will be assessed on their understanding of half-life via post lab questions and graphs.
