VM Jensen

Tami Pepperman:

Freedom from Government Trent Goodbaudy,2013-02-16 As a sensible moral human being how many times have we heard ridiculous statist arguments in support of government In this all new installment of Freedom from Government Trent Goodbaudy exposes and examines the most common statist arguments in support of government Each chapter examines a different delusional statist remark and how these sentiments are immoral irrational and usually have no basis in fact whatsoever From Without rules there would be chaos to Taxes are fees for services and The economy would collapse without government of course no statist argument would be complete without the Who would build the roads question Other topics covered The use of force divine right the social contract healthcare voting sacrificing liberty for security if you don t like it you can leave monopolies would abound without government endorsing the government by taking a benefit from it and much more This is the best weapon to absolutely destroy any statist delusion you encounter

The Case for Contention

Jonathan Zimmerman,Emily Robertson,2017-04-24 From the fights about the teaching of evolution to the details of sex education it may seem like American schools are hotbeds of controversy But as Jonathan Zimmerman and Emily Robertson show in this insightful book it is precisely because such topics are so inflammatory outside school walls that they are so commonly avoided within them And this they argue is a tremendous disservice to our students Armed with a detailed history of the development of American educational policy and norms and a clear philosophical analysis of the value of contention in public discourse they show that one of the best things American schools should do is face controversial topics dead on right in their classrooms Zimmerman and Robertson highlight an aspect of American politics that we know all too well We are terrible at having informed reasonable debates We opt instead to hurl insults and accusations at one another or worse sit in silence and privately ridicule the other side Wouldn t an educational system that focuses on how to have such debates in civil and mutually respectful ways improve our public culture and help us overcome the political impasses that plague us today To realize such a system the authors argue that we need to not only better prepare our educators for the teaching of hot button issues but also provide them the professional autonomy and legal protection to do so And we need to know exactly what constitutes a controversy which is itself a controversial issue The existence of climate change for instance should not be subject to discussion in schools scientists overwhelmingly agree that it exists How we prioritize it against other needs such as economic growth however that is worth a debate With clarity and common sense wisdom Zimmerman and Robertson show that our squeamishness over controversy in the classroom has left our students woefully underserved as future citizens But they also show that we can fix it if we all just agree to disagree in an atmosphere of mutual respect
