Text Mining With Matlab:

Text Mining with MATLAB® Rafael E. Banchs, 2012-08-14 Text Mining with MATLAB provides a comprehensive introduction to text mining using MATLAB. It is designed to help text mining practitioners as well as those with little to no experience with text mining in general familiarize themselves with MATLAB and its complex applications. The first part provides an introduction to basic procedures for handling and operating with text strings. Then it reviews major mathematical modeling approaches. Statistical and geometrical models are also described along with main dimensionality reduction methods. Finally, it presents some specific applications such as document clustering, classification, search, and terminology extraction. All descriptions presented are supported with practical examples that are fully reproducible. Further reading as well as additional exercises and projects are proposed at the end of each chapter for those readers interested in conducting further experimentation.
