*Covenants and Third-Party Creditors* Daniela Matri,2017-10-17 This book adds to the debate on the effects of covenants on third party creditors externalities which have recently become a focus of discussion in the contexts of bankruptcy law corporate law and corporate governance The general thrust of the debate is that negative effects on third party creditors predominate because banks act in their own self interest After systematising the debated potential positive and negative externalities of covenants the book empirically examines these externalities It investigates the banks factual conduct and its effects on third party creditors in Germany and the US The study s most significant outcome is that it disproves the assumption that banks disregard third party creditors interests These findings are then interpreted with the tools of economic analysis particularly with the concept of common pool resources CPRs Around the aggregated value of the debtor company s asset pool as CPR exists an n person prisoner s dilemma between banks and third party creditors No creditor knows when and under what conditions the other creditor will appropriate funds from the debtor company s asset pool This coordination problem is traditionally addressed by means of bankruptcy law and collaterals However the incentive structure that surrounds the bilateral private governance system created by covenants and an event of default clause a CPR private

governance system is found to also be capable of tackling this problem Moreover the interaction between the different regulation spheres bankruptcy law collateral and the CPR private governance system has important implications for both the aforementioned discussions as well as the legal treatment of covenants and event of default clauses Covenants alone cannot be seen as an alternative to institutional regulation the complete CPR private governance system and its interaction with institutional regulation must also be taken into consideration In addition their function must first find more acceptance and respect in the legal treatment of covenants and event of default clauses The CPR private governance system fills a gap in the regulation of the tragedy of the commons by bankruptcy law and collateral This has particularly important implications for the German 138 BGB 826 BGB and ad hoc duties to disclose insider information

The Independence of Credit Rating Agencies Gianluca Mattarocci,2013-10-22 The Independence of Credit Rating Agencies focuses on the institutional and regulatory dynamics of these agencies asking whether their business models give them enough independence to make viable judgments without risking their own profitability Few have closely examined the analytical methods of credit rating agencies even though their decisions can move markets open or close the doors to capital and bring down governments The 2008 financial crisis highlighted their importance and their shortcomings especially when they misjudged the structured financial products that precipitated the collapse of Bear Stearns and other companies This book examines the roles played by rating agencies during the financial crisis illuminating the differences between U S and European rating markets and also considers subjects such as the history of rating agencies and the roles played by smaller agencies to present a well rounded portrait Reports on one of the key causes of the 2008 financial crisis agencies that failed to understand how to analyze financial products Describes inherent business model and pricing conflicts that compromise the independence of credit rating agencies Reveals how rating agencies large and small regulatory bodies and vested interests interact in setting fees and policies
