Task based language teaching is now a well established pedagogic approach but problematic issues remain such as whether it is appropriate for all learners and in all instructional contexts This book draws on the author s experience of working with teachers together with his knowledge of relevant research and theory to examine the key issues It proposes flexible ways in which tasks can be designed and implemented in the language classroom to address the problems that teachers often face with task based language teaching It will appeal to researchers and teachers who are interested in task based language teaching and the practical and theoretical issues involved It will also be of interest to students and researchers working in the areas of applied linguistics TESOL and second language acquisition **TBLT as a Researched Pedagogy** Virginia Samuda,Kris Van den Branden,Martin Bygate,2018-10-15

Bringing together experienced classroom researchers and teacher educators from different countries where tasks are playing an influential role in language education this collected volume critically explores how TBLT research can engage with pedagogy and how TBLT pedagogy can engage with research A defining part of the TBLT project has always been a dual concern both with the nature and use of tasks in language teaching and with empirical research to guide and support classroom practitioners the two concerns suggesting a central and reciprocal relationship between research and pedagogy However this relationship has at times been unbalanced and its centrality has sometimes gone by default problems which this volume aims to address The introduction proposes criteria to improve the congruence between the research base of TBLT and the concerns and terms of reference of classroom practitioners Using a range of methodologies the individual chapters illustrate and explore different aspects of this theme The book will be of interest to all those wishing to further their understanding of and or investigate the use of TBLT in educational contexts *Individual Differences and Task-Based Language Teaching* Shaofeng Li,2024-06-06

This volume consists of a collection of empirical studies and research syntheses investigating the role of individual difference ID variables in task based language teaching TBLT a pedagogical approach that emphasizes the importance of the performance of meaning oriented tasks in facilitating second language learning TBLT is subject to learner external as well as learner internal factors with the former referring to task and context related factors and the latter to ID factors pertaining to learner traits dispositions or propensities To date the research has focused primarily on learner external factors and there has been insufficient and unsystematic research on individual difference factors This volume brings centre stage this important but under researched dimension by means of a comprehensive in depth examination of the role of key ID factors in TBLT The

volume integrates theory research and pedagogy by spelling out the mechanism through which IDs influence learning attainment behaviours and processes examining evidence for theoretical claims and discussing ways to apply research findings and cater to individual differences in the task based classroom
