Events in Britain Bernard Schofield,1981 Events and the Social Sciences Hazel Andrews,Teresa Leopold,2013 As the events management field expands as an area of study there is a need to move beyond the business and marketing driven approaches which dominate the literature towards a more advanced conceptual analysis and understanding of events from a socio cultural context This book addresses this need by examining intersections between the social sciences and the emerging field of events management It applies and specifically contextualises social science theories within the discourse of events to provide a greater understanding of the significance of events in contemporary society It first outlines the value of approaching the study of events from a social science perspective and then moves on to an in depth exploration of relevant theories exploring topics such as identity culture consumerism representation and place It concludes with a summary of each chapter and a discussion of ways in which events can be further explored through the lens of the social sciences The book features international case studies based on a variety of event types ranging from sports events religious and cultural events and community events which are used throughout to address contemporary issues and show theory in practice Think Points are integrated into each chapter to encourage the reader to reflect on theories and each chapter concludes with summary points further reading and links to useful websites to consolidate learning and further knowledge This book will provide upper level students academics and researchers interested in events as well as those from related social science disciplines with a robust socio cultural conceptual analysis of the subject and a greater understanding of the significance of events in contemporary society **SPECIAL EVENT POSTMARKS OF THE UNITED KINGDOM VOLUME 3** George R
