

# Evidence of Evolution Lab (Lab 38)

## Background

Much evidence has been found to indicate that living things have evolved or changed gradually during their natural history. The study of fossils as well as work in embryology, biochemistry and comparative anatomy provides evidence for evolution.

## Objective

In this lab you will learn about homologous, analogous and vestigial structures and their significance in evolution theory. You will also compare amino acid sequencing of humans to other vertebrates.

## Materials

Colored pencils

## Procedures and Observations

### Part I. HOMOLOGOUS STRUCTURES

1. Carefully examine the drawings of the bones shown in Figures 1 on the next page. Look for similarities among the various animals.
  - a. Color each part of the human arm a different color. (All bones of the wrist should be a single color, the bone groups of the hand should be a different single color.) Then color the corresponding bone in each of the other animals the same color as the human bone.
  - b. Describe the function of each set of bones below:

**Table 1**

Animal	Function
human	
whale	
cat	
bat	
bird	
crocodile	

- c. Are the bones arranged in a similar way in each animal?
- 

These structures are formed in similar ways during embryonic development and share like arrangements; however, they have somewhat different forms and functions. They are called *homologous structures*.

The Reading Comprehension section focuses on comprehension of passages of different genres based on the latest patterns. Book has been divided into chapters which contains exhaustive study material along with well-discussed examples.

**Einstein Relatively Simple: Our Universe Revealed In Everyday Language** Ira Mark Egdall, 2014-01-06 Outstanding Academic Title for 2014 by CHOICE. Einstein Relatively Simple brings together for the first time an exceptionally clear explanation of both special and general relativity. It is for people who always wanted to understand Einstein's ideas but never thought they could. Told with humor, enthusiasm, and rare clarity, this entertaining book reveals how a former high school drop-out revolutionized our understanding of space and time. From  $E=mc^2$  and everyday time travel to black holes and the big bang, Einstein Relatively Simple takes us all, regardless of our scientific backgrounds, on a mind-boggling journey through the depths of Einstein's universe. Along the way, we track Einstein through the perils and triumphs of his life, follow his thinking, his logic, and his insights, and chronicle the audacity, imagination, and sheer genius of the man recognized as the greatest scientist of the modern era. In Part I on special relativity, we learn how time slows and space shrinks with motion and how mass and energy are equivalent. Part II on general relativity reveals a cosmos where black holes trap light and stop time, where wormholes form gravitational time machines, where space itself is continually expanding, and where some 13.7 billion years ago, our universe was born in the ultimate cosmic event, the Big Bang.

**CliffsNotes ACT Cram Plan, 2nd Edition** Jane R. Burstein, William Ma, Nichole Vivion, 2014-06-24 This updated edition of the best-selling CliffsNotes ACT Cram Plan uses calendars to create a specific study plan for ACT test takers depending on how much time they have left before they take the test. Features of this plan to ace the exam product include: Timed boxed calendars for preparing to take the ACT, two-month study calendar, one-month study calendar, and one-week study calendar. Diagnostic test that helps test takers pinpoint strengths and weaknesses so they can focus their review on topics in which they need the most help. Subject reviews that cover everything on the exam: English, math, science, and the dreaded essay. Full-length practice test with answers and explanations.
