Validation of Pharmaceutical Processes James P. Agalloco, Frederick J. Carleton, 2007-09-25. Completely revised and updated to reflect the significant advances in pharmaceutical production and regulatory expectations. This third edition of *Validation of Pharmaceutical Processes* examines and blueprints every step of the validation process needed to remain compliant and competitive. The many chapters added to the prior compilation examine various aspects of *Biosimilars and Interchangeable Biologics*.

Sarfraz K. Niazi, 2018-10-30. What's the Deal with Biosimilars. Biosimilars are gaining momentum as new protein therapeutic candidates that can help fill a vital need in the healthcare industry. The biological drugs are produced by recombinant DNA technology that allows for large scale production and an overall reduction in costs and development. Part of a two volume set that covers varying aspects of biosimilars. *Biosimilars and Interchangeable Biologics Strategic Elements* explores the strategic planning side of biosimilar drugs and targets issues surrounding biosimilars that are linked to legal matters. This includes principal patents and intellectual property, regulatory pathways and concerns about affordability on a global scale. It addresses the complexity of biosimilar products and it discusses the utilization of biosimilars and related biological drugs in expanding world markets. Of specific interest to practitioners, researchers and scientists in the biopharmaceutical industry, this volume examines the science, technology, finance, legality, ethics and politics of biosimilar drugs. It considers strategic planning elements that include an overall understanding of the history and the current status of the art and science of biosimilars and it provides detailed descriptions of the legal, regulatory and commercial characteristics. The book also presents a global strategy on how to build, take to market and manage the next generation of biosimilars throughout their life cycle.
