Rethinking Global Modernism Vikramaditya Prakash, Maristella Casciato, Daniel E. Coslett, 2021-11-22 This anthology collects developing scholarship that outlines a new decentred history of global modernism in architecture using postcolonial and other related theoretical frameworks By both revisiting the canons of modernism and seeking to decolonize and globalize those canons the volume explores what a genuinely global history of architectural modernism might begin to look like Its chapters explore the historiography and weaknesses of modernism s normative interpretations and propose alternatives to them The collection offers essays that interrogate transnationalism in new ways reconsiders the agency of the subaltern and the roles played by infrastructures materials and global institutions in propagating a diversity of modernisms internationally Issues such as colonial modernism architectural pedagogy cultural imperialism and spirituality are engaged With essays from both established scholars and up and coming researchers this is an important reference for a new understanding of this crucial and developing topic □□□□□, 1998 *Finnish Architecture and the Modernist Tradition* Malcolm Quantrill, 2012-12-06 This is a unique and comprehensive study of the entire span of Finnish architecture in the 20th century Using comparative critical analysis the author weaves Aalto s contribution into his overview of the evolution of modern Finnish architecture and includes the work of a range of lesser published figures It will be of considerable interest to architects art historians and all those interested in modern Finnish architecture *Finland as a Knowledge Economy 2.0* Kimmo Halme, Ilari Lindy, Kalle A. Piirainen, Vesa Salminen, Justine White, 2014-04-21 Finland is known for its consistent progress in the economy and competitiveness as well as the egalitarian society underneath it Yet the challenges experienced by Finland in the beginning of the 20th century were similar to those experienced by many countries today Finland emerged as an independent nation in the midst of international economic and political turbulence In spite of its remoteness relative scarcity of natural resources smallness of the home market and recent history characterized by wars and social cleavages Finland transformed itself from an agriculture based economy in the 1950 s into one of the leading innovation driven knowledge based economies and high tech producers in the twenty first century The development was rapid and involved determined action and sometimes drastic decisions by the government and other key actors Today at the end of 2013 Finland is facing new types of challenges both domestically and internationally in efforts to maintain its societal sustainability and economic competitiveness *Finland Knowledge Economy 2.0* presents some of the key policies elements initiatives and decisions behind Finland s path into the Knowledge Economy of today The authors hope to provide the readers inspiration new ideas and novel insights Hopefully some of the lessons learned may prove valuable in another context Based on this account of the development of Finnish Knowledge Economy the authors have identified six areas of lessons each described in detail in respective chapters The book should not be seen as a scientific all encompassing study but rather as a Knowledge Economy cook book with practical cases links and insights provided for further exploration Form Function Finland, 2000
