1. Converted to Catholicism and issued Edict of Nantes, which declared that Huguenots could live in peace in France and set up their own houses of worship in certain cities; devoted his reign to rebuilding France and its prosperity
2. Forbade Protestant cities from having walls; weakened power of nobles by ordering them to take down their fortified castles and by increasing power of government agents
3. Turned them to skepticism, the idea that nothing can be known for certain, and led them to question church doctrine, which claimed to be the only truth
4. Followed a strict policy of mercantilism by taking steps to make France self-sufficient, expanding and protecting French industries, and encouraging migration to France's colony of Canada, where the fur trade would add to French commercial strength
5. Popularized opera and ballet, supported writers such as Moliere, promoted art that glorified the monarchy and supported absolute rule
6. His many enemies combined forces in the League of Augsburg and thereby became strong enough to stop France.
7. Made France a power in Europe and a model of culture, but laid the groundwork for revolution because of staggering debts and royal abuse of power

World History: Connections to Today Elisabeth Gaynor Ellis, Pearson/Prentice Hall, 2003-12 *A Guide to Marx's 'Capital' Vols I-III* Kenneth Smith, 2012-11-15 This book provides a comprehensive guide to all three volumes of Karl Marx's Capital with advice on further reading and points for further discussion Recognizing the contemporary relevance of Capital in the midst of the current financial crisis Kenneth Smith has produced an essential guide to Marx's ideas particularly on the subject of the circulation of money capital This guide uniquely presents the three volumes of Capital in a different order of reading to that in which they were published placing them instead in the order that Marx himself sometimes recommended as a more user friendly way of reading Dr Smith also argues that for most of the twentieth century the full development of the capitalist mode of production CMP has been undermined by the existence of a non capitalist third world which has caused the CMP to take on the form of what Marx called a highly developed mercantile system rather than one characterized by an uninterrupted circuit of industrial capital of the kind he expected would develop While the guide can be read as a book in its own right it also contains detailed references to Volumes I III so that students seminars and discussion groups can easily make connections between Smith's explanations and the relevant parts of Capital *Equity & Access* Denver J.
