Objective

This program is for understanding the concept of a pro rata debt and how it is used in business practice.

Directions

After this program, you will be able to: (1) understand the concept of a pro rata debt and (2) calculate the amount of a pro rata debt.

Pro Rata Debts

Pro rata debts are debts that are shared equally among all the creditors of a company. For example, if a company has a debt of \$100,000 and there are 100 creditors, each creditor would be entitled to receive \$1,000. Pro rata debts are often used to settle a company's debts when the company is liquidated. In this case, the company's assets are sold and the proceeds are used to pay the debts. The amount that each creditor receives is determined by the company's assets and the number of creditors.

1. **Example:** A company has a debt of \$100,000. There are 100 creditors. Each creditor is entitled to receive \$1,000.
