Grand Teton National Park (N.P.), Bison and Elk Management Plan, 2005 Economics for Environmental Professionals Frank R. Spellman, 2015-04-13 Environmental professionals are often called upon to find solutions to environmental degradation problems or to lead the way in planning to prevent them Because they come mainly from the environmental and science disciplines most environmental professionals have limited training in the fundamentals of economics This book is designed to provide t You Report to Me David Bernhardt, 2023-05-09 In this firsthand account David Bernhardt 53rd Secretary of the United States Department of the Interior describes how he witnessed firsthand the administrative state s transformation from a collection of departments under the command of the President into a sprawling and unaccountable bureaucracy Resistance to the Trump presidency within the civil service drew media attention but it was only part of a larger problem a federal bureaucracy that often goes its own way contrary to the policies of elected leadership In this insider s account David L Bernhardt reveals how the bureaucratic swamp really operates and how unaccountable power has been concentrated deep within the administrative state resulting in dysfunction Executive agencies were created to implement legislation and presidential directives yet career civil servants use them to advance their own agendas instead Congress often writes laws broadly letting subject matter experts at administrative agencies fill in the details with regulations Then agency employees sometimes substitute their own policy preferences for actual statutory or regulatory language They may also fail to appreciate that their authority is delegated from an official who answers to the president Bernhardt gives examples of federal employees undermining the administration s policies simply by refusing to work on a task slow walking it or doing a subpar job Administrative agencies have further gained power through judicial deference to an agency s own interpretation of a statute when its enforcement action is challenged Courts essentially abdicate their role of interpreting the law leaving citizens with little recourse against penalties or prohibitions Both legislative and judicial powers have thus been shifted to the executive branch where they are exercised without adequate political oversight Drawing on his experiences working under two administrations Bernhardt explains how President Trump s enabling leadership showed a path for reining in the administrative state He calls on political leadership to turn off autopilot and take control of their agencies and on Congress and the judiciary to assert their constitutional authority before an unaccountable federal bureaucracy destroys the Founders vision of government by consent of the governed **Congressional Record** United States. Congress, 1994 Into Russian Nature Alan D. Roe, 2020 National parks are perhaps the most recognized environmental protection institution in the world and have long attracted the interest of historians This is the first academic work on Russian national parks It spans from the years before the Great October Revolution to the present and examines movements to establish national parks from European Russia to Siberia and the Far East It is a story of grandiose visions in which Russian environmentalists conceived of ways to alter the state s relationship to nature and of demoralizing

disappointment when the lofty ambitions of different park visionaries fell far short of their hopes *Department of State
