24. _____ **true** Two stars will be just resolved if the central bright band of one star falls on the first dark band of the second star.
25. _____ **narrower** The diffraction pattern formed by blue light in a microscope is wider than that formed by red light.
26. _____ **microscopes only** Using a larger lens is practical in reducing effects of diffraction on the resolving power of both microscopes and telescopes.
27. _____ **true** White light would be more useful than green light in reducing diffraction patterns formed in a microscope.
