**Human Flourishing: The End of Law** W. Michael Reisman, Roza Pati, 2023-10-09. This rich volume is an homage to the significant impact Professor Siegfried Wiessner has had on scholarship and practice in many areas of international and domestic law. Reflecting the depth and breadth of his writings, it is a collection of thought provoking original essays exploring topics as diverse as theory about law, human rights, the rights of indigenous peoples, the rule of law, constitutional law, the rights of migrants, international investment law, and arbitration space law, the use of force, and many more, all integrated by the problem and policy oriented framework of what has come to be known as the New Haven School. Its title, *Human Flourishing: The End of Law*, reflects the conviction that the purpose of law ought to be to allow humans to achieve their full potential to thrive and develop both materially and spiritually under the law. The volume contributes to a vision of the law as a public order in which the common interest is clarified and implemented peacefully, and offers a source of inspiration for scholars and practitioners working towards such an order of human dignity.

**Writing STEAM** Vivian Kao, Julia Kiernan, 2022-03-03. This edited collection positions writing at the center of interdisciplinary higher education and explores how writing instruction, writing scholarship, and writing program administration bring STEM and the humanities together in meaningful, creative, and beneficial ways. Writing professionals are at the forefront of a cross-pollination between STEM (Science, Technology, Engineering, and Mathematics) and the arts and humanities. In their work as educators, scholars, and administrators, they collaborate with colleagues in engineering, scientific, technical, and health disciplines, offer new degree programs that allow students to bring the humanities to bear on design, experiments, and build an academic culture that promotes a vision of the humanities in the twenty-first century, as well as a vision of technology that is decidedly human. This collection surveys and promotes that work through chapters focused on writing instruction, writing scholarship, and writing program administration, covering topics that include data-driven writing, courses, public science communication, non-traditional college students, creative writing, gamification, skills transfer, and Writing Across the Curriculum programs. *Writing STEAM* will be essential reading for scholars, instructors, and administrators in writing studies, rhetoric, and composition, STEM, and a variety of interdisciplinary programs; it will aid in teacher training for both humanities and STEM courses focused on writing and communication.
