The Economist ,1884 **John Maynard Keynes** , Joseph R. Cammarosano,2013-12-18 Over the course of his professional life John Maynard Keynes altered his views from free trade in the classical tradition to restricted trade At the end of his career his position on the issue was still not categorically resolved even though the evidence seems to suggest that he moved closer to a system of managed trade In that model nations would not leave their foreign trade interests open to the vagaries of the free market but rather exercise some degree of control over them just as they would their domestic economies Nevertheless there is no general agreement among economists as to whether Keynes ended his career in the camp of the free traders or aligned himself with the protectionists John Maynard Keynes Free Trader or Protectionist seeks an answer to this question by analyzing Keynes own views on this issue as stated in his major publications letters speeches testimony before government bodies newspaper articles participation in conferences and other sources Through this detailed review of what Keynes himself had to say on the issue as opposed to what others have alleged this book strives to make a significant contribution to the resolution of this issue

The Economist ,1900 **Metaphor and Gender in Business Media Discourse** V. Koller,2004-05-25 This new study reconciles cognitive metaphor theory with Critical Discourse Analysis to offer a fresh approach to the study of metaphor In applying this framework to a substantial corpus of texts from business magazines the author shows how metaphors of war sports and evolutionary struggle are used to construct business as a masculinized social domain In view of the subtle but pervasive socio cognitive impact of these metaphors the study raises the question of possible alternatives and the scope for change in business media discourse

An Industrial Geography of Cocaine Christian M. Allen,2013-10-14 Latin American cocaine trafficking organizations comprise an indigenous globally competitive multinational industry Their business operations are deeply ingrained within the economic and political systems of countries throughout the region While criminal enterprises operate in a more complex and uncertain setting than licit firms their competitive success is determined in fundamentally similar ways Models developed by geographers to explain the spatial behavior of licit multinational firms are profitably applied here to the operations of drug trafficking operations
