HYDROLOGY it is the Science of water.

— it deals with occurrence, circulation and distribution of water of the Earth and atmosphere

Precipitation
{ Rain, Snow
Hail etc }

It is further classified into two

(a) Scientific Hydrology : it is the study of water concerned with academic aspects i.e. records of past data

(b) Engineering Hydrology OR Applied Hydrology :

Study of water concerned with engineering application of sources of water, water process i.e. precipitation, evaporation, transpiration, infiltration etc.

— in order to understand occurrence, circulation and storage of water, hydrological cycle or water cycle can be analysed

— The precipitation and evaporation continues forever hence a balance is maintained b/w the two, which can be understood from water cycle

→ Since it is the continuous process it is non-startling point, end point or, point at which it is paused

— water in oceans vapourises upwards and forms clouds, which under condensation
