

Grammaticalization and English Complex Prepositions

What is a grammatical unit? How does grammatical structure evolve? How can we best investigate the mental representation of grammar? What is the connection between language use and language structure? This book aims to help answer such questions by presenting a detailed analysis of English complex prepositions (e.g. *in spite of* or *with respect to*) on the basis of large amounts of authentic language data from the Middle Ages up to the present day.

This work addresses the debate on the grammatical status of complex prepositions by investigating both diachronic and Present-day English corpus data within the framework of grammaticalization theory. Taking such a usage-based approach, the study offers ample empirical support for the claim that complex prepositions form meaningful elements of grammar, refuting those who maintain that complex prepositions as a grammatical class do not exist.

Few studies carried out within the grammaticalization framework have drawn so extensively on language corpora as suitable sources of authentic data, and the investigation here reveals that such an application can lead to new insights about the mechanisms of grammaticalization. This is a must-read for linguists interested in grammaticalization and corpus linguistics.

Sebastian Hoffmann is Lecturer in Linguistics at Zurich University, Switzerland.
