Proceedings of the 2024 5th International Conference on Education, Knowledge and Information Management (ICEKIM 2024) Yunshan Kuang,Lixin Zhu,Xiangyang Zhang,Intakhab Alam Khan,2024-08-31 This is an open access book ICEKIM is an annual conference that has been held four times 2024 5th International Conference on Education Knowledge and Information Management ICEKIM 2024 will be held on April 19 21 2024 in Chengdu China Information Technology in the context of education is revolutionizing the way we store process and communicate information making it more accessible and meaningful Advanced analytics artificial intelligence and cloud computing are some of the technological developments that have profoundly impacted the way educational institutions manage and use data leading to more personalized and effective learning experiences ICEKIM will focus on how information management promotes the effective utilization of knowledge and educational development how to build effective information management assistance systems and how to promote widespread adoption to meet the practical needs of society ICEKIM 2024 is to bring together innovative academics and industrial experts in the field of Education Knowledge and Information Management to a common forum The

primary goal of the conference is to promote research and developmental activities in Education Knowledge and Information Management and another goal is to promote scientific information interchange between researchers developers engineers students and practitioners working all around the world

Engineering Education John Heywood,2006-01-24 A synthesis of nearly 2 000 articles to help make engineers better educators While a significant body of knowledge has evolved in the field of engineering education over the years much of the published information has been restricted to scholarly journals and has not found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and advocates in curriculum and research development The author s first objective is to provide an illustrative review of research and development in engineering education since 1960 His second objective is with the examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum s internal structure which integrates assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others Unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation

Journal of Engineering Education ,2000

Engineering Design Joseph W. Walton,1991

Threshold Concepts within the Disciplines ,2008-01-01 Threshold Concepts within the Disciplines brings together leading writers from various disciplines and national contexts in an important and readable volume for all those concerned with teaching and learning in higher education The foundational principle of threshold concepts is that there are in each discipline conceptual gateways or portals that must be negotiated to arrive at important new understandings In crossing the portal transformation occurs both in knowledge and subjectivity Such transformation involves troublesome knowledge a key concern for contributors to this book who identify threshold concepts in their own fields and suggest how to deal with them Part One extends and enhances the threshold concept framework containing chapters that articulate its qualities its links to other social theories of learning and other traditions in educational research Part Two

encompasses the disciplinary heart of the book with contributions from a diversity of areas including computing engineering biology design modern languages education and economics In the many empirical case studies educators show how they have used the threshold concept framework to inform and evaluate their teaching contexts Other chapters emphasise the equally important being and becoming dimension of learning Part Three suggests pedagogic directions for those at the centre of the education project with contributions focusing on the socialisation of academics and their continuing quest to be effective teachers The book will be of interest to disciplinary teachers educational researchers and educational developers It also is of relevance to issues in quality assurance and professional accreditation
