Techniques and Principles in Language Teaching Diane Larsen-Freeman,1986 **Methods and Methodologies for Language Teaching** Andy Curtis,2017-05-31 An essential guide for pre service and in service English language teachers There are countless theories and approaches to language teaching and with so many different methodologies available it can be difficult for teachers to weigh up the pros and cons of each or even to know where to start Written by an experienced teacher and researcher *Methods and Methodologies for Language Teaching* takes a fresh look at ten approaches to classroom language teaching and learning Each chapter includes suggested activities and further reading presenting the origins and key features of each methodology before discussing its relation to assessment and learning outcomes This is a clear concise and context driven introduction to teaching methods which reasserts the significance of methodology as a central pillar of language learning

Approaches and Methods in Language Teaching Jack C. Richards,Theodore S. Rodgers,2014-04-16 In addition this third edition includes content on the teaching and learning environment with chapters on learners and methods teachers and methods plus approaches methods and the curriculum *The Silent Way - A Method for the German Classroom?* Peter Grube,2009-04 Seminar paper from the year 2007 in the subject Didactics English Pedagogy Literature Studies grade 1 0 Martin Luther University Angewandte Anglistik und Amerikanistik course Proseminar Traditional and Alternative Teaching Concepts SS 2007 language English abstract The Silent Way is a teaching method that considers learning to be a conscious cognitive process However the Silent Way tries to involve the whole of the learner considering cognitive and affective aspects That is why Roslyn Young can conclude The Silent Way is usually considered to be one of the alternative or humanistic approaches to language teaching Taking this into consideration the question can be of

interest whether the Silent Way is a method which can easily be used at a typical German grammar or comprehensive school. It seems obvious that there are several factors which prevent the method from being applied at German schools other than alternative methods such as Suggestopedia, Superlearning or the Birkenbihl Method cannot find their way into German classrooms either. Sometimes only small parts of the method are applied as in the case of Suggestopedia whose traces can be found in the way some texts are dealt with in modern text books such as the new Green Line books. Therefore this paper will try to see whether the thesis that the Silent Way is not suitable for a typical German classroom will prove to be the result of a superficial prejudice or not. To achieve this aim the paper will give a short overview over the method in a first step. Secondly, some aspects which seem to be important for the role the method could play at German schools will be considered. The roles of learners and teachers and especially the image of the ideal Silent Way learner will be concerned as well as the learning process in its various stages and aspects like group sizes or materials that are needed. The latter do also often prove to be of note in the decision for or against a method at school.
