Applications of Non-Pollen Palynomorphs F. Marret, J. O'Keefe, P. Osterloff, M. Pound, 2021-10-29

This long-awaited book about non-pollen palynomorphs (NPPs) aims to cover gaps in our knowledge of these abundant but understudied palynological remains. NPPs such as fungal spores, testate amoebae, dinoflagellate cysts, acritarchs, and animal remains are routinely recovered from palynological preparations of marine or terrestrial material from Proterozoic to recent geological times. This book gives the reader a comprehensive overview of the different types of NPPs with examples from diverse time periods and environments. It provides guidance on sample preparation to maximize the recovery of these NPPs, detailed information on their diversity and ecological affinity, clarification on the nomenclature, and demonstrates their value as environmental indicators. This volume will become the reference guide for any student, academic, or practitioner interested in everything else in their palynological preparations.
