International Migration and Citizenship Today Niklaus Steiner,2023-03-17 This completely revised and updated textbook explores the moral economic political and cultural dimensions of the movement of people across international borders In style and substance it is designed to spark thoughtful discussions and to challenge readers to draw their own conclusions to questions such as how should democracies balance the rights of immigrants with those of citizens What exactly constitutes persecution and how should we define a refugee How should democracies allocate citizenship Can and should a distinction be made between voluntary and forced migration and does one group of migrants deserve admission more than the other What does a reasonable border policy look like The rise of populism the vote for Brexit and the unprecedented flow of refugees around the world are all evidence that these questions remain highly salient controversial and unresolved The content has been thoroughly updated to cover Migration into Europe since 2015 Climate change as a driver of migration and the concept of environmental refugees Unaccompanied minors fleeing gang violence asylum for victims of domestic violence family separation policies and the building of a wall on the U S Mexican border The controversies surrounding the Danish cartoons Charlie Hebdo and hijabs as examples of the tensions in liberal democracies between free speech individual freedom religious expressions and minority rights The Dream Act and Deferred Action for Childhood Arrivals DACA Demographic shifts and the debates around multiculturalism and diversity Guest worker programs as alternatives to admitting immigrants Intended as the main text for undergraduate classes on international migration the book will also appeal to broad survey courses on world politics comparative politics international relations global history and more specialized courses on human rights citizenship and nationalism

8 Billion and Counting Jennifer D. Sciubba,2022-03-29 A provocative description of the power of population change to create the conditions for

societal transformation As the world nears 8 billion people the countries that have led the global order since World War II are becoming the most aged societies in human history At the same time the world's poorest and least powerful countries are suffocating under an imbalance of population and resources In *8 Billion and Counting* political demographer Jennifer D Sciubba argues that the story of the twenty first century is less a story about exponential population growth as the previous century was than it is a story about differential growth marked by a stark divide between the world's richest and poorest countries Drawing from decades of research policy experience and teaching Sciubba employs stories and statistics to explain how demographic trends like age structure and ethnic composition are crucial signposts for future violence and peace repression and democracy poverty and prosperity Although we have a diverse global population demographic trends often follow predictable patterns that can help professionals across the corporate nonprofit government and military sectors understand the global strategic environment Through the lenses of national security global health and economics Sciubba demonstrates the pitfalls of taking population numbers at face value and extrapolating from there Instead she argues we must look at the forces in a society that amplify demographic trends and the forces that dilute them particularly political institutions or the rules of the game She shows that the most important skills in demographic analysis are naming and being aware of your preferences rethinking assumptions and asking the right questions Provocative and engrossing *8 Billion and Counting* is required reading for business leaders policy makers and anyone eager to anticipate political economic and social risks and opportunities A deeper understanding of fertility mortality and migration promises to point toward the investments we need to make today to shape the future we want tomorrow
